Dock low version

SOFAS

2019

Piero Lissoni

Description

In the version with an Eastern-style low seat height, Dock is a collection of upholstered elements with a multiple soul, rendered highly flexible by the countless configurations made possible by the numerous elements included in the collection. This horizontally-spanning project is underscored by a highly textured platform: a dynamic element that extends beyond the sides of the sofa to create a support surface. The slender armrests, available in two depths, are generously padded, just like the backrest. The cushions create a play of sizes and proportions, making it possible to put together double-sided, corner and chaise longue compositions, with or without backrests, suitable for use at the centre of the room or for more traditional solutions. Dock comes with a series of accessories offering a vast array of possibilities: it is possible to insert extra elements between the seat cushions, such as comfortable padded armrests, while functional and supporting elements can be placed on the platform, ensuring further customisation possibilities so as to experience and design the system at will. The body is upholstered in either fabric or leather. Dock also comes in a higher version raised off the ground.

Technical information

Seat internal frame (covered base)
tubular steel and steel profiles, multi-layered wood panel, polyester fibre cover
Seat internal frame (wooden base)
tubular steel and steel profiles, veneered multi-layered wood panel, solid wood
Back and armrest internal frame
tubular steel and steel profiles
Seat cushion upholstery
shaped polyurethane of different density, sterilized down, polyester fibre cover
Back cushion upholstery
sterilized down, polyester fibre cover
Top
veneered MDF wood fibre panel
Cap
steel
Feet
thermoplastic material
Armrest support (DA31B)
aluminium and steel
Armrest top (DA31B)
solid wood, shaped polyurethane of different density, polyester fibre cover
Service element support
steel
Service element top
solid wood or glass
Ferrules
plastic material
Cover
fabric (cannetè profile) or leather
