

Struttura: in legno multistrato con molleggio garantito da cinghie elastiche ad alta componente di caucciù. Preparazione della struttura sedile in poliuretano espanso ad alta resilienza composto da numerosi strati di quote differenziate. Lo strato superiore è formato da singole fasce sagomate ad alta componente elastica che, aggregate allo strato inferiore, garantiscono una migliore morbidezza nel tempo.

Gli elementi WING e MIX hanno un bracciolo e/o schienale in metallo annegato in schiuma poliuretanic ignifuga.

Tutta la struttura è rivestita con trapuntino di fibra termolegata trasparente accoppiata con tela di cotone bianca anallergica che conferisce morbidezza.

La particolare confezione della fodera della struttura (schienale, braccioli e seduta) è realizzata assemblando varie parti di tessuto con l'ausilio di una fettuccia in ecopelle color bronzo fissata tramite una doppia cucitura.

Nella versione in pelle, la fettuccia è nella medesima pelle del rivestimento.

Cuscinatura: imbottitura cuscini schienale in piuma d'oca canalizzata (certificata Assopiuma, Etichetta Oro) con inserto centrale in Memory Foam (materiale termosensibile).

Sfoderabilità: cuscini schienale completamente sfoderabili in tutte le versioni (tessuto e pelle). Elemento WING sfoderabile solo in tessuto.

Rivestimento della struttura in tessuto sfoderabile rimuovendo la base perimetrale in metallo dopo aver allentato le apposite manopole zigrinate tramite chiave in dotazione. Rivestimento in pelle fisso.

Base: cornice perimetrale in estruso di alluminio con elementi di giunzione in alluminio pressofuso verniciati lucido anti-touch color Bronzo. Appoggio a terra tramite piedini in metallo, verniciati lucido anti-touch color Bronzo.

Scivolante protettivo in SEBS colore bronzo (gomma morbida antigraffio).

N.B.: Per agevolare la rimozione del rivestimento e la consegna, i braccioli e gli schienali sono sfilabili dalla base tramite un sistema di innesto e sgancio rapido.

Structure: in plywood with suspension provided by high-rubber-content elastic webbing. The seat structure is made of several layers of variable-density, high resilience polyurethane foam. The upper layer is made of single high-elastic-content contoured straps which, combined with the lower layer, guarantee enhanced softness over time.

WING and MIX have an armrest and/or backrest made of a metal frame coated in fireproof polyurethane foam.

The entire structure has a breathable heat-bonded quilted fiber casing laminated to a white hypoallergenic cotton fabric which lends softness.

A special assembly was used for the structure covering (backrest and armrests). The various parts in fabric were joined by using a bronze-colored strip of eco-leather with double-stitched detail.

In the leather version, the strip is in the same leather as the one used for the upholstery.

Cushions: channeled goose down padding for the backrest cushions (Assopiuma certified, Gold Label) with Memory Foam core insert (temperature-sensitive material).

Covers: backrest cushion covers are completely removable in all the versions (fabric and leather). The WING element cover is removable only for the fabric version.

The fabric structure covers come off by removing the metal base after loosening the ribbed handles with the key that is provided. Structural leather upholstery is not removable.

Base: extruded aluminium frame with cast aluminium joint fittings, with a polish anti-fingerprint Bronze varnished colour. The metal feet also have a polish anti-fingerprint Bronze varnished colour. Protective bronze-painted SEBS glide (soft scratchproof rubber).

N.B.: To facilitate transport and removal of covers, the armrests and backrest can be removed from the base by means of a quick coupling and uncoupling system.

Struktur: Schichtholz mit Federung durch elastische Gurte mit hohem Kautschukinhalt. Aufbereitung der Sitzstruktur mit hochelastischen unterschiedlich dick geschäumten, Polyurethanschichten. Die obere Schicht besteht aus einzelnen, hochelastischen Formteilen, die, verbunden mit der darunter liegenden Schicht, eine optimal dauerhafte Weiche garantieren.

Die Elemente WING und MIX haben eine Arm- und/oder Rückenlehne aus Metall, eingebettet in feuerfesten Polyurethanschäum.

Die gesamte Struktur ist mit thermosensiblen, atmungsaktivem Steppbezug überzogen, kombiniert mit antiallergischem, weißem Baumwolltuch, das elastische Weichheit verleiht.

Die besondere Anfertigung des Strukturbezugs (Rücken- und Armlehnen) wird realisiert, indem die einzelnen Stoffteile mit einer doppelten Naht verbunden werden, in die ein bronzefarbiges Kunstlederband eingefügt wurde.

Bei der Variante mit Lederbezug, wird das Band aus dem gleichen Leder des gewählten Sofabezugs angefertigt.

Kissenpolsterung: Polsterung der Rückenkissen aus kanalisierten Gänsedaunen (Gold Label, zertifiziert von Assopiuma) mit zentraler Einlage aus Memory Foam (thermosensiblen Material). Das Element "Wing" ist nur mit Stoffbezug abziehbar.

Abziehbarkeit: Rückenkissen in allen Varianten (Stoff- und Lederbezug) vollkommen abziehbar. Das Element WING ist nur mit Stoffbezug abziehbar.

Stoffbezug der Struktur abziehbar durch Entfernung des Rahmengestells aus Metall, nachdem die vorgesehenen Drehknöpfe mit dem mitgelieferten Schlüssel gelockert werden. Lederbezug nicht abziehbar.

Untergestell: Gestellrahmen aus stranggepresstem Aluminium mit Verbindungselementen aus Aluminiumdruckguss, glänzend mit Anti-Fingerprint Beschichtung, bronzefarbig lackiert. Bodenaufgabe mit Metallfüßchen, glänzend mit Anti-Fingerprint Beschichtung, bronzefarbig lackiert.

Gleitschutz aus bronzefarbigem SEBS (weicher, kratzfester Gummi).

N.B.: Um das Abziehen und den Transport zu vereinfachen, sind Arm- und Rückenlehnen über ein praktisches, schnelles Stecksystem mit dem Untergestell verbunden.

Structure : en multiplis, suspension assurée par des sangles élastiques à haute teneur en caoutchouc. Structure d'assise en polyuréthane expansé à haute résilience composé de nombreuses couches à densité différenciée. La couche supérieure est formée de bandes moulées très élastique qui, assemblées à la couche inférieure, sont en mesure de garantir une meilleure souplesse au fil du temps.

Les éléments WING et MIX ont un accoudoir et/ou un dossier en métal noyé dans de la mousse polyuréthane ignifuge.

Toute la structure est recouverte d'un petit édredon en fibre thermoliée, doublée de toile de coton blanc anallergique pour davantage de souplesse.

Les différentes parties de la housse de la structure (dossier, accoudoirs et assise) sont assemblées, d'une façon originale, à l'aide d'une bande en éco-cuir couleur bronze fixée par une double couture.

Coussins : rembourrage des coussins de dossier en plume d'oe canalisée (certifiée Assopiuma, Étiquette Or) avec insert central en mousse thermosensible à mémoire de forme (Memory Foam). Seul l'élément "Wing" en tissu est déhoussable.

Dans la version en cuir, la bande est réalisée dans le cuir choisi pour le revêtement du canapé.

Déhoussage : coussins de dossier entièrement déhoussables dans toutes les versions (tissu et cuir). Seul l'élément WING en tissu est déhoussable.

Le revêtement de la structure en tissu se déhousse en démontant la base en métal après avoir desserré les boutons cannelés à l'aide de la clé fournie à cet effet. Revêtement en cuir fixe.

Base : cadre en aluminium extrudé avec éléments de raccordement en aluminium moulé sous pression, peinture brillante anti-trace couleur Bronze. Repose sur des pieds en métal, peinture brillante anti-trace couleur Bronze.

Patins glisseurs en SEBS couleur bronze (caoutchouc souple anti-rayure).

N.B. : Pour faciliter le déhoussage et la livraison, les accoudoirs et les dossiers peuvent être désolidarisés de la base grâce à un mécanisme d'enclenchement et déclenchement rapide.
