AWARDS

Visionnaire, fondato dalla casa madre IPE con sede a Bologna dal 1959, è un brand meta-lusso di riferimento nel settore dell'interior design Made in Italy, amato per la capacità progettuale one-of-a-kind cucita sui desideri dei propri clienti. Il brand opera in più di 55 paesi con una presenza di oltre 30 store monomarca e una rete di department store e multimarca in tutto il mondo. Dal 2004 Visionnaire ha dato vita ad uno stile distintivo, caratterizzato da una vivace sperimentazione sui materiali, volumi dall'equilibrio inaspettato e motivi inconfondibili che celebrano le origini tutte italiane della maison. Grazie alla collaborazione di un team di designer eclettici e visionari, italiani e stranieri, si pone come partner ideale per proposte di bespoke in contesti residenziali e contract, nell'hotellerie di lusso così come nel settore yachting ed aviazione. Il brand basa la propria attività sul valore della conoscenza e la continua ricerca del concetto di bellezza contemporanea, si conferma come artefice di progetti e prodotti di design di altissima sartoria, incentivando e valorizzando le produzioni delle maestranze artigianali locali, presenti sul territorio italiano.

Società Benefit dal 2021, Visionnaire definisce il proprio business come promotore di valore positivo per la comunità ed intende perseguire, nell'esercizio dell'attività economica, uno o più effetti positivi - o ridurre gli effetti negativi - nei confronti di persone, comunità, territori ed ambiente.

COMPANY PROFILE

Visionnaire, founded by the company IPE, based in Bologna since 1959, is a meta-luxury brand of reference in the sector of interior design Made in Italy, renowned for its one-of-a-kind design prowess tailored to respond to the desires of its clients. The brand operates in over 55 countries, thanks to over 30 exclusive monobrand stores and a network of department store and multibrand showrooms all over the world. Since 2004 Visionnaire has formulated a distinctive style, based on lively experimentation on materials, volumes of unexpected poise and inimitable motifs that reveal the totally Italian background of the company. Thanks to collaboration with a team of eclectic, visionary Italian and foreign designers, the company is an ideal partner for bespoke proposals in residential and contract applications, luxury hotellerie, as well as the yachting and aviation sectors. The brand bases its activity on the value of knowledge and continuing research on the concept of contemporary beauty, confirming its exceptional ability to create design projects and products of outstanding sartorial workmanship, fostering and restoring value to the skills of local artisans located across the Italian territory.

Benefit company from 2021, Visionnaire defines its business as a promoter of positive value for the community and intends to pursue, in the exercise of economic activity, one or more positive effects - or reduce negative effects - towards people, communities, territories and environment.

Il brand, che si pone oggi come manifesto Meta-Luxury, si basa sui valori della conoscenza e la ricerca di atemporalità che vanno a sommarsi per raggiungere un risultato unico nel suo genere. Questo lusso dei contenuti e dei valori trova applicazione nell'uso responsabile dei materiali, in una ricerca tecnologica che l'azienda porta avanti con impegno, in investimenti di efficientamento della catena produttiva e della qualità della vita dei propri artigiani. La convergenza tra benessere del singolo individuo e dell'intero ecosistema che lo ospita si pone al centro della riflessione di Visionnaire all'alba di una nuova decade di necessaria presa di coscienza ambientale e sociale. Benessere e sostenibilità si traducono anche in scelta di tessuti e pelli innovative performanti, che attraverso logiche di riciclo e processo produttivo a basso impatto, rappresentano un nuovo traguardo tecnologico e sostenibile.

Nel 2019 Visionnaire ha ottenuto le certificazioni FSC® Forest Stewardship council® C147146 e PEFC™ Programme for Endorsement of Forest Certification, impegnandosi ad orientare i propri clienti verso una gestione responsabile del patrimonio forestale e la volontà di garantire che i legni utilizzati provengano da tagli legali e da filiere certificate. Visionnaire inoltre certificata ISO 9001 dal 2011, a garanzia del rispetto degli standard qualitativi di gestione, in un più ampio progetto di sviluppo e valorizzazione del saper fare italiano, che si basa sulla scelta di realizzare le produzioni interamente nel nostro territorio, da sessanta anni.

Visionnaire prosegue il suo percorso di sviluppo sostenibile, concependo il progetto del catalogo Timeless in un'ottica carbon neutral, tutelando l'ambiente e andando a compensare le emissioni di CO2 prodotte per la sua realizzazione. Le emissioni dirette ed indirette verranno neutralizzate tramite carbon credits (certificati VCS - Verified Carbon Standard) attraverso un progetto rivolto alla tutela della foresta amazzonica brasiliana nell'area di Portel, dentro lo Stato del Parà: è una tipologia di progetto denominato REDD+, acronimo dall'inglese "Reducing emissions from deforestation and forest degradation".

Il Progetto nasce per prevenire la deforestazione delle foreste native, che si è verificata a causa del disboscamento illegale per occupazione abusiva e per tentativi di implementare i pascoli: il coinvolgimento della popolazione locale permette di creare alternative occupazionali legate non alla distruzione quanto alla conservazione del capitale naturale ed alla riqualificazione delle aree forestali degradate.

Visionnaire è seguita in questo percorso da Rete Clima, ente che promuove azioni di Corporate Social Responsibility (CSR), di sostenibilità e di decarbonizzazione, offrendo consulenza alle organizzazioni sensibili alle problematiche ambientali.

META-LUXURY

The brand, which stands today as a Meta-Luxury manifesto, is based on the values of knowledge and research of timelessness that add up to achieve a unique result of its kind. This luxury of contents and values finds application in the responsible use of materials, in a technological research that the company carries out with commitment, in investments to make the production chain more efficient and the quality of life of its artisans. The convergence between the well-being of the individual and the entire ecosystem that hosts it arises at the center of Visionnaire's reflection at the dawn of a new decade of necessary environmental and social awareness. Wellness and sustainability also translate into the choice of innovative performing fabrics and leathers through recycling logics and a low impact production process, they represent a new technological and sustainable milestone.

In 2019 Visionnaire obtained the FSC® Forest Stewardship council® C147146 certification and the PEFC™ Program for Endorsement of Forest Certification, which demonstrates its commitment to achievement of the global objective of directing the market towards responsible management of forest heritage and the desire to ensure that the woods used come from legal cuts and certified supply chains. Visionnaire has also been ISO 9001 certified since 2011, to guarantee compliance with the quality standards of management, in a wider project of development and enhancement of Italian know-how, which is based on the choice to produce productions entirely in Italy, for sixty years.

CARBON NEUTRALITY

Visionnaire continues along its path of sustainable growth, conceiving the Timeless catalogue in a carbon neutral perspective, protecting the environment and offsetting the CO2 emissions produced by its creation. Direct and indirect emissions will be neutralized with carbon credits (VCS certified - Verified Carbon Standard) through a project aimed at the protection of the Brazilian Amazon forest in the Portel area, within the State of Parà: it is a type of project called REDD +, an acronym from the English "Reducing emissions from deforestation and forest degradation".

The project was created to prevent the deforestation of native forests, which occurred due to illegal deforestation due to illegal occupation and attempts to implement pastures: the involvement of the local population makes it possible to create employment alternatives linked not to destruction but to the conservation of the natural capital natural and the requalification of degraded forest areas.

Visionnaire is followed in this path by Rete Clima, an organization that promotes Corporate Social Responsibility (CSR), sustainability and decarbonisation actions, offering support to companies sensitive to environmental issues.

INFORMAZIONI GENERALI SUI PRODOTTI

I prodotti Visionnaire nascono dalla realizzazione di un'idea tramite tecniche costruttive e di lavorazione derivanti da molteplici settori produttivi strettamente artigianali appartenenti alla tradizione manifatturiera italiana. Le tecnologie impiegate uniscono la tradizione all'avanguardia, conferendo ai nostri prodotti unicità e qualità di livello superiore. L'impiego di materiali e tecniche esclusive, la lavorazione manuale e la filosofia sartoriale della nostra produzione artigianale, conferisce ai prodotti caratteristiche distintive uniche per cui apparenti irregolarità o differenze sono da considerarsi peculiarità che rendono il prodotto unico ed esclusivo.

LEGNO

Le strutture dei mobili sono realizzate a partire da pannelli (multistrati e fibra di legno) finiti con laccature lucide o opache (colori RAL/NCS) oppure impiallacciati in essenza (selezione essenze). Alcune parti di mobili sono in legno massello lavorato e finito con effetto naturale "a poro aperto" o laccato lucido. Per essenze e masselli, l'aspetto ed il colore del legno possono variare leggermente a distanza di tempo e da una fornitura all'altra per via delle differenze naturali del legno stesso.

Gli imbottiti hanno una struttura interna in legno massello e multistrati con molleggio a cinghie elastiche e connessioni in ferramenta.

IL PERCORSO VERSO LO SVILUPPO SOSTENIBILE

Seguendo il proprio impegno verso lo sviluppo sostenibile e una gestione responsabile del patrimonio forestale, Ipe s.r.l - Visionnaire ha ottenuto le certificazioni aziendali FSC™ Forest Stewardship Council™ e PEFC™ Programme for Endorsement of Forest Certification. Per consolidare questo percorso Ipe s.r.l - Visionnaire propone una selezione di prodotti della collezione Anniversary (2019) con certificazione FSC™ e PEFC™ ordinabili su richiesta.

MARMO

Il marmo è un materiale naturale selezionato da Visionnaire per i top di tavoli, tavolini, cucine nonché per parti di mobili in massello di marmo come basamenti, piedistalli, ecc. La finitura superficiale del marmo può essere lucida o lavorata con diverse finiture come "mano leather" e opaca. La lavorazione e la finitura delle parti in marmo unisce l'alta tecnologia alla manualità ed alla cura artigianale sulla finitura di ogni singolo prodotto. L'aspetto ed il colore delle lastre utilizzate possono variare da una fornitura all'altra per via delle differenze naturali nelle venature e nei colori della pietra stessa.

PELLE/CUOIO

Tutte le nostre pelli sono ricavate da bovini accuratamente selezionati. La concia delle nostre pelli enfatizza le qualità dei vari modelli conferendo caratteristiche estetiche, tattili e di comfort uniche. Nel campionario pelli sono presenti materiali uniti, stampati ed intrecciati, ognuno dei quali è lavorato con trattamenti idonei ad enfatizzare le caratteristiche dell'articolo scelto; imperfezioni, cicatrici, diversità di opacità e tonalità sono da considerarsi caratteristiche che rendono unica la pelle.

AZEROCARE zerocare

Azerocare è il primo processo protettivo specifico per il marmo, brevettato da Antolini, ed è la soluzione ideale per gli ambienti bagno e cucina, in quanto garantisce una protezione permanente contro macchie e corrosione dovute al contatto delle superfici con sostanze organiche acide (il cui PH varia da 3 a 8). Questo processo svolge la sua funzione protettiva, mantenendo l'estetica, i colori e la percezione al tatto della pietra naturale. Azerocare è quindi una garanzia contro eventuali danni derivanti dall'utilizzo di prodotti come vino, caffè, olio, aceto, salsa di pomodoro, succhi di frutta, nonché profumi, dentifrici, detergenti, lozioni, rossetti o eau de toilette. Questo processo rende inoltre le superfici non permeabili, evitando la proliferazione di batteri. Questo trattamento è disponibile sui marmi Black & Gold, Dover White e Dalmata per i prodotti: tavolo da pranzo Kerwan, mobile trucco Kobol e consolle lavabo Leonardo, oltre che per produzione di elementi su richiesta.

MANUTENZIONE GENERICA

Tutti i prodotti Visionnaire sono oggetti pregiati e costruiti con materiali esclusivi che vengono rifiniti con vernici, marmi, vetri, essenze caratterizzati da una protezione superficiale che ne preserva le qualità e la durata. Per non danneggiare o deteriorare l'aspetto superficiale dei nostri materiali, si raccomanda una pulizia periodica con panno umido morbido, non abrasivo, evitando in ogni caso l'uso di prodotti aggressivi, solventi, acidi o alcool.
In caso di danneggiamento accidentale superficiale, si consiglia di contattare Ipe s.r.l. - Visionnaire per suggerimenti sul ripristino delle superfici. Per i tessuti si rimanda all'etichetta di cura e manutenzione, per le pelli si consiglia di contattare Ipe s.r.l. - Visionnaire per suggerimenti sul ripristino delle superfici tramite appositi kit di pulizia disponibili a richiesta.

ASPETTO DEL PRODOTTO E PROPRIETÀ INTELLETTUALE

Ipe s.r.l. – Visionnaire si riserva il diritto di modificare i propri prodotti senza preavviso.
In caso di completamento e combinazione tra prodotti diversi, se non specificato nell'ordine, il prodotto sarà realizzato nella versione attuale alla data dell'ordine.
La tonalità e l'aspetto superficiale di pelli, tessuti, essenze lignee, masselli di legno, marmi ed onici possono subire differenze tra una fornitura e l'altra; in caso di abbinamento tra prodotti diversi, è richiesto di specificarlo nell'ordine.

I disegni inclusi nel presente catalogo non definiscono i dettagli del prodotto; le misure mostrate sono indicative e possono subire modifiche senza preavviso.

I diritti di proprietà intellettuale sono di piena ed esclusiva proprietà di Ipe s.r.l. - Visionnaire.
Il Cliente si impegna a non compiere alcun atto che possa essere in contrasto con la proprietà industriale di Ipe s.r.l. - Visionnaire, non deve rimuovere o alterare il marchio/logo Visionnaire e deve usarlo esclusivamente in conformità con le istruzioni ricevute da Ipe s.r.l. - Visionnaire.

GENERAL PRODUCT INFORMATION

Our products are the embodiment of ideas realised by using production techniques derived from different sectors of handicraft, belonging to Italian traditional artisanry. These technologies combine tradition with cutting-edge production processes, characterising our products as unique and top-quality.
The use of high-end materials and techniques, the craftsmanship and tailor-made philosophy inspiring our handmade production lend on our products those unique features, which make any apparent imperfection or difference an additional distinctive peculiarity.

WOOD

Furniture structures are made from panels (in plywood or wood fibre) finished with a shiny or matt lacquer (RAL/NCS colours) or with wood veneer (veneered finish selection). Some parts of the furniture are in solid wood, treated and finished with an open-pore natural effect or with a shiny lacquer. Veneer and solid wood may go through subtle colour changes over time and from one consignment of material to another, due to the natural differences characterising wood itself.

Padded furniture has an internal frame in solid wood and plywood with elastic webbing strapsand metal fittings.

A PATH TO SUSTAINABLE DEVELOPMENT

Keeping its commitment to implementation of sustainable development and responsible management of forest heritage, Ipe s.r.l - Visionnaire has obtained the FSC™ Forest Stewardship Council™ certification and PEFC ™ Program for Endorsement of Forest Certification. With a view to moving forward on this path, Ipe s.r.l - Visionnaire offers a selection of products from the Anniversary collection (2019) which can be ordered with FSC™ and PEFC ™ certificates upon request.

MARBLE

Marble is a natural material selected by Visionnaire for top of tables, low tables, kitchens, other than for parts of furniture made in solid marble, such as ballasts, stands, and so on. Marble can be polished or matt, or it can be treated as to obtain particular finishes, such as "leather-hand" effect. The treatment and finish of marble parts combine high-end technology with craftsmanship and artisan accuracy when finishing each single product. The look and colour of slabs employed may vary from one consignment of material to another, due tot the natural differences in veins and shade of marble itself.

LEATHER/EMERY LEATHER

All our leathers come from carefully selected bovines. The tanning of hides enhances the quality of each model, giving unique aesthetical features, tactile feeling and comfort. The leather sample book includes single-coloured, printed and interwoven materials, which undergo treatment specifically conceived to emphasise the characteristics of the selected product; subtle imperfections, scars, difference in opacity and shade are to be considered signs of the uniqueness of the leather.

AZEROCARE zerocare

Azerocare is the first specific protective process for marble, patented by Antolini, and is the ideal solution for bathroom and kitchen spaces as it guarantees permanent protection against stains and corrosion caused by contact of surfaces with acidic organic substances (whose PH ranges from 3 to 8). This process carries out its protective function, keeping aesthetics, colors and perception to the touch of the natural stone. Azerocare is therefore a guarantee against possible damages deriving from the use of products such as wine, coffee, oil, vinegar, tomato sauce, fruit juices, as well as perfumes, toothpastes, detergents, lotions, lipsticks or eau de toilette. This process also makes surfaces non-permeable, avoiding the proliferation of bacteria. This treatment is available on the Black&Gold, Dover White and Dalmata marbles for the products Kerwan dining table, Kobol wellness unit and Leonardo wellness unit, as well as for the production of elements on request.

GENERAL MAINTENANCE INSTRUCTIONS

All Visionnaire products are valuable items and they are made with high-end materials which are finished with lacquers, marbles, glasses, wood veneers protected by a superficial coating preserving their quality over time. To prevent any damage or deterioration of the look of our materials, we recommend to clean them regularly using a humid soft (no abrasive) cloth, always avoiding the use of aggressive products, solvents, acids or alcohol.
In case of accidental damage of a surface, we invite you to contact Ipe s.r.l. - Visionnaire to receive indications of how to restore of the surface. For damaged fabrics, refer to maintenance instructions written on the label; for leather, we invite you to contact Ipe s.r.l - Visionnaire to receive indications of how to restore the leather, using the appropriate cleaning kit available upon request.

PRODUCT LOOK AND INTELLECTUAL PROPERTY

Ipe s.r.l. - Visionnaire reserves the right to change its products without notice.
In the event of order completion or combination of different products, unless otherwise specified in the order, products will be made in compliance with the most recent version released at the time of the order.
Colour shade and look of leathers, fabrics, wood veneers, solid woods, marbles and onyx stones may change from one consignment of material to another; in the event different products are combined, this information shall be clearly stated in the order.

Drawings included in the catalogue do not represent product details; any dimensions show are indicative only and may be changed without notice.

Intellectual property rights are fully and solely owned by Ipe s.r.l. - Visionnaire.
The Client agrees to avoid undertaking any act which may be in contrast with Ipe s.r.l. - Visionnaire intellectual property, he/she shall not remove or change Visionnaire trademark/logo and shall use it solely in compliance with instructions received by Ipe s.r.l - Visionnaire.

CABINA ARMADIO - WALK-IN CLOSET
Ufficio Stile Visionnaire

Sistema componibile per cabina armadio in alluminio e vetro.
Disponibile in versione:
- "CABINA ARMADIO A GIORNO" con moduli aperti SENZA schienale;
- "CABINA ARMADIO A GIORNO" con moduli aperti CON schienale;
- "ARMADIO" con moduli chiusi da ante in cristallo temperato scatola to (sp. 8 mm) con maniglie in alluminio e impugnatura lucida o rivestita in pelle, sia nella versione con schienale sia nella versione a doppia apertura bifacciale (versione da centro stanza).

Le spalle portanti sono composte da un doppio montante in alluminio verniciato a polveri con profilo decorativo lucido e pannelli laterali rivestiti in pelle o tessuto oppure in essenza, marmo o laminato decorativo (su progetto). Internamente sono dotate di elettrificazione per illuminazione a LED e preforatura invisibile per lo spostamento dei ripiani.
I moduli sono configurabili con gli accessori interni quali:
- RIPIANI - Ripiani in alluminio con top in cristallo dotati di profilo luminoso a LED e connettore plug & play per lo spostamento delle mensole senza bisogno di attrezzi. Sotto i ripiani si possono montare i bastoni per appenderia;
- CASSETTIERE - Cassettiere e porta pantaloni con struttura in vetro e alluminio con rivestimento dei frontali in pelle o tessuto oppure in vetro nero, con top in cristallo fumé.

Gli schienali, quando presenti, sono disponibili in pelle o tessuto oppure in essenza o laminato decorativo (su progetto). La modularità del sistema prevede elementi angolari customizzabili e moduli base in tre dimensioni standard da 75, 95 e 115 cm di larghezza, modificabile nelle versioni "su misura". Il modulo "armadio" con ante in cristallo ha misure fisse di 250 cm di altezza e 95 cm di larghezza.
La profondità del modulo è fissa in 67 cm. L'altezza standard è di 250 cm con un massimo (per i "su misura") di 300 cm. I moduli sono personalizzabili attraverso una selezione di accessori divisori per cassetti e di appenderia.
Le parti in metallo lucido sono disponibili nella selezione finiture metalliche, le parti in alluminio verniciato a polveri bronze sablè e manganese, le parti in legno sono disponibili nei colori RAL/NCS e nella selezione essenze. Impianto di illuminazione a LED da collegare a rete domestica, gli alimentatori di ogni modulo sono posizionati sotto le basi.

REGOLE BASE DI CONFIGURAZIONE:

- Disponibile solo con progetto tecnico preliminare
- Profondita' fissa (non personalizzabile)
- Altezza massima per moduli a giorno: 300 cm
- Aumentabile in larghezza solo nei moduli a giorno e con schienale con ripiani (non nei moduli armadio - non nelle cassettiere)
- Altezza massima moduli armadio: 250 cm
- Tutte le composizioni necessitano del 'kit fianchi terminali'

Modular walk-in wardrobe in aluminium and glass.
Available in:
- "WALK-IN CLOSET" configuration with open units WITHOUT back panels;
- "WALK-IN CLOSET" configuration with open units WITH back panels;
- "WARDROBE" configuration, combining closed units with doors in crystal glass (thick. 8 mm), aluminium handles with shiny finish or upholstered in leather, with back panel or with doors on both sides (double opening suitable for centre-room installation).

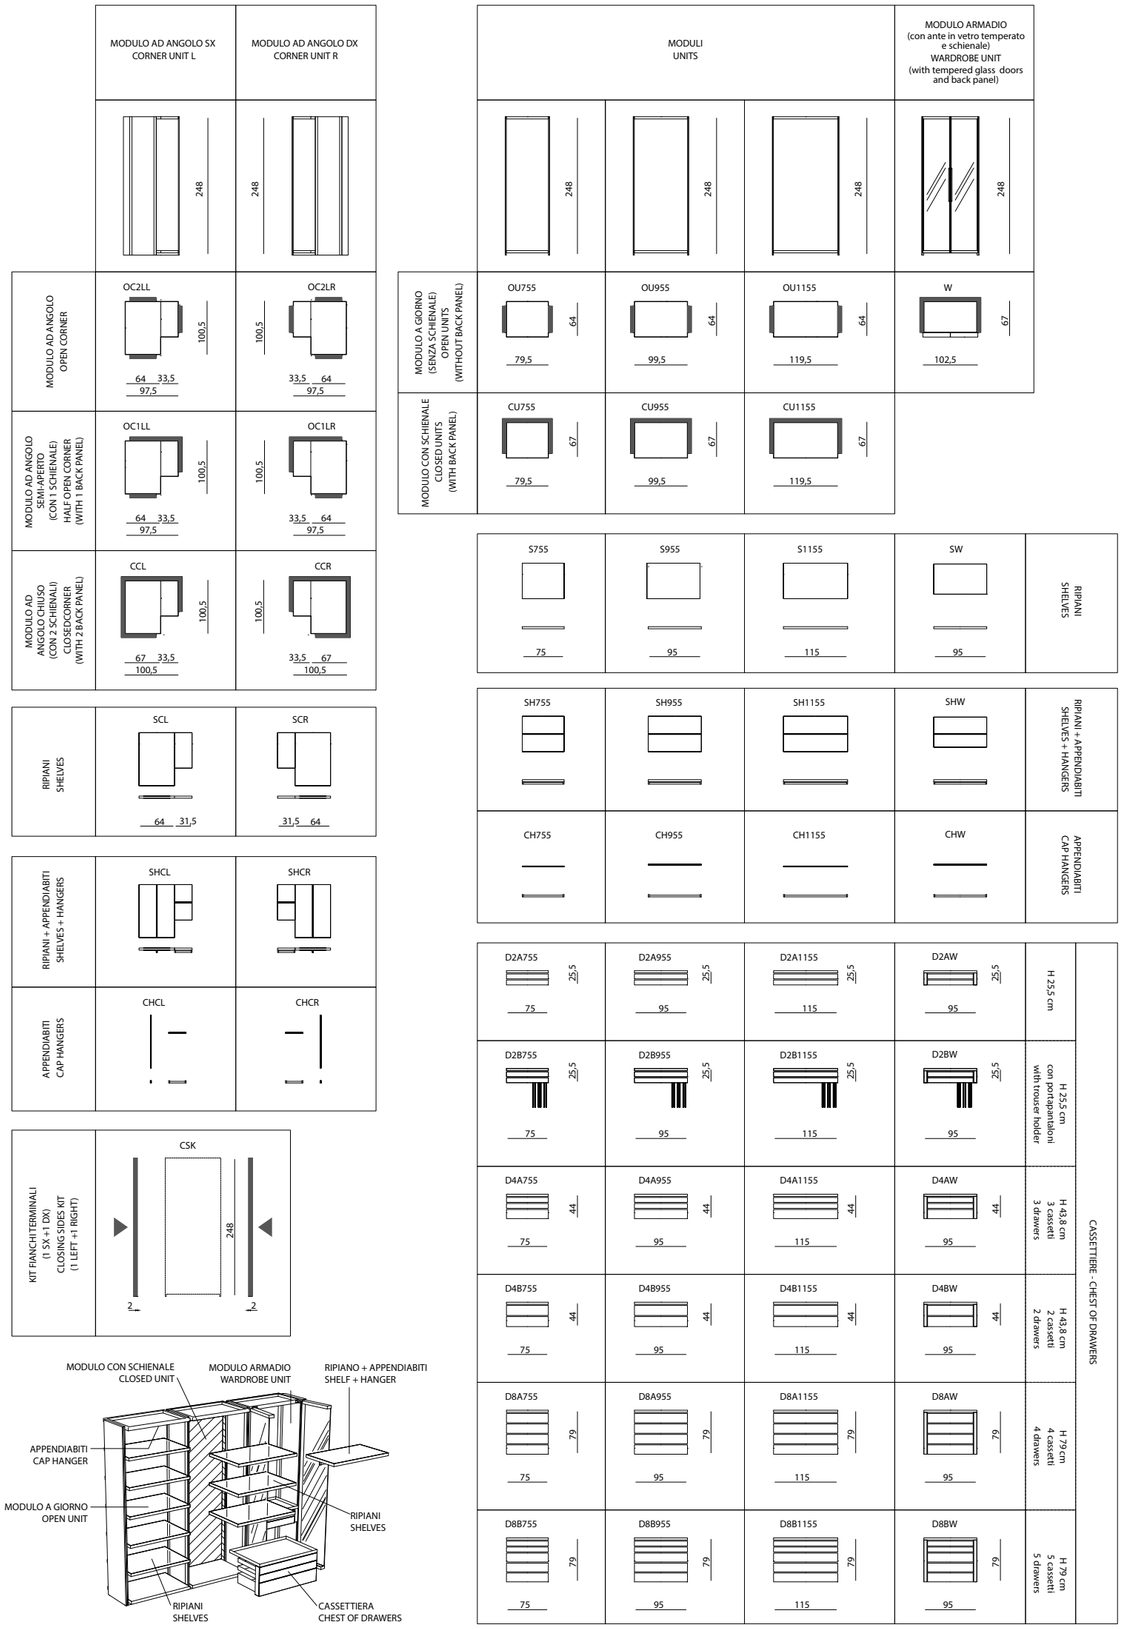

Supporting lateral elements consisting of a double frame in powder-coated aluminium with polished decorative profile; side panels upholstered in leather or fabric, or covered in veneered wood, marble or decorative laminate (upon project). Internally equipped with LED lighting system and invisible pre-drilled holes allowing to shelves height adjustment.
Units can be internally configured by selecting the following accessories:
- SHELVES - Shelves in aluminium with crystal top, LED lighting profile and plug & play connector to move shelves without using hardware. Hanging rods can be mounted under the shelves;
- CHEST OF DRAWERS - Chests of drawers and trousers racks with structure in glass and aluminium, drawers front upholstered in leather or fabric or covered in black lacquered glass, top in smoked crystal glass.

Back panels, whenever selected, can be upholstered in leather or fabric or finished with veneered wood or decorative laminate (upon project). The system includes corner units fitting made-to-measure composition and linear units available in three different widths, 75 cm – 95 cm – 115 cm, which can be customised upon request. Unit with crystal doors in one size, height 250 cm – width 95 cm.
Unit depth: cm 67, equal for all sizes. Standard height: 250 cm – height can be customised up to 300 cm. Units can be customized by choosing among a selection of divider sets for drawers and hangers.
Components in shiny metal can be finished with any lacquer of the shiny metal finish selection; aluminium components finished with bronze sable or manganese powder coating; wooden elements finished with RAL/NCS lacquer or with any veneer of the wood veneer finish selection. LED lighting system to be connected to the home network, the power supplies of each module are positioned under the bases.

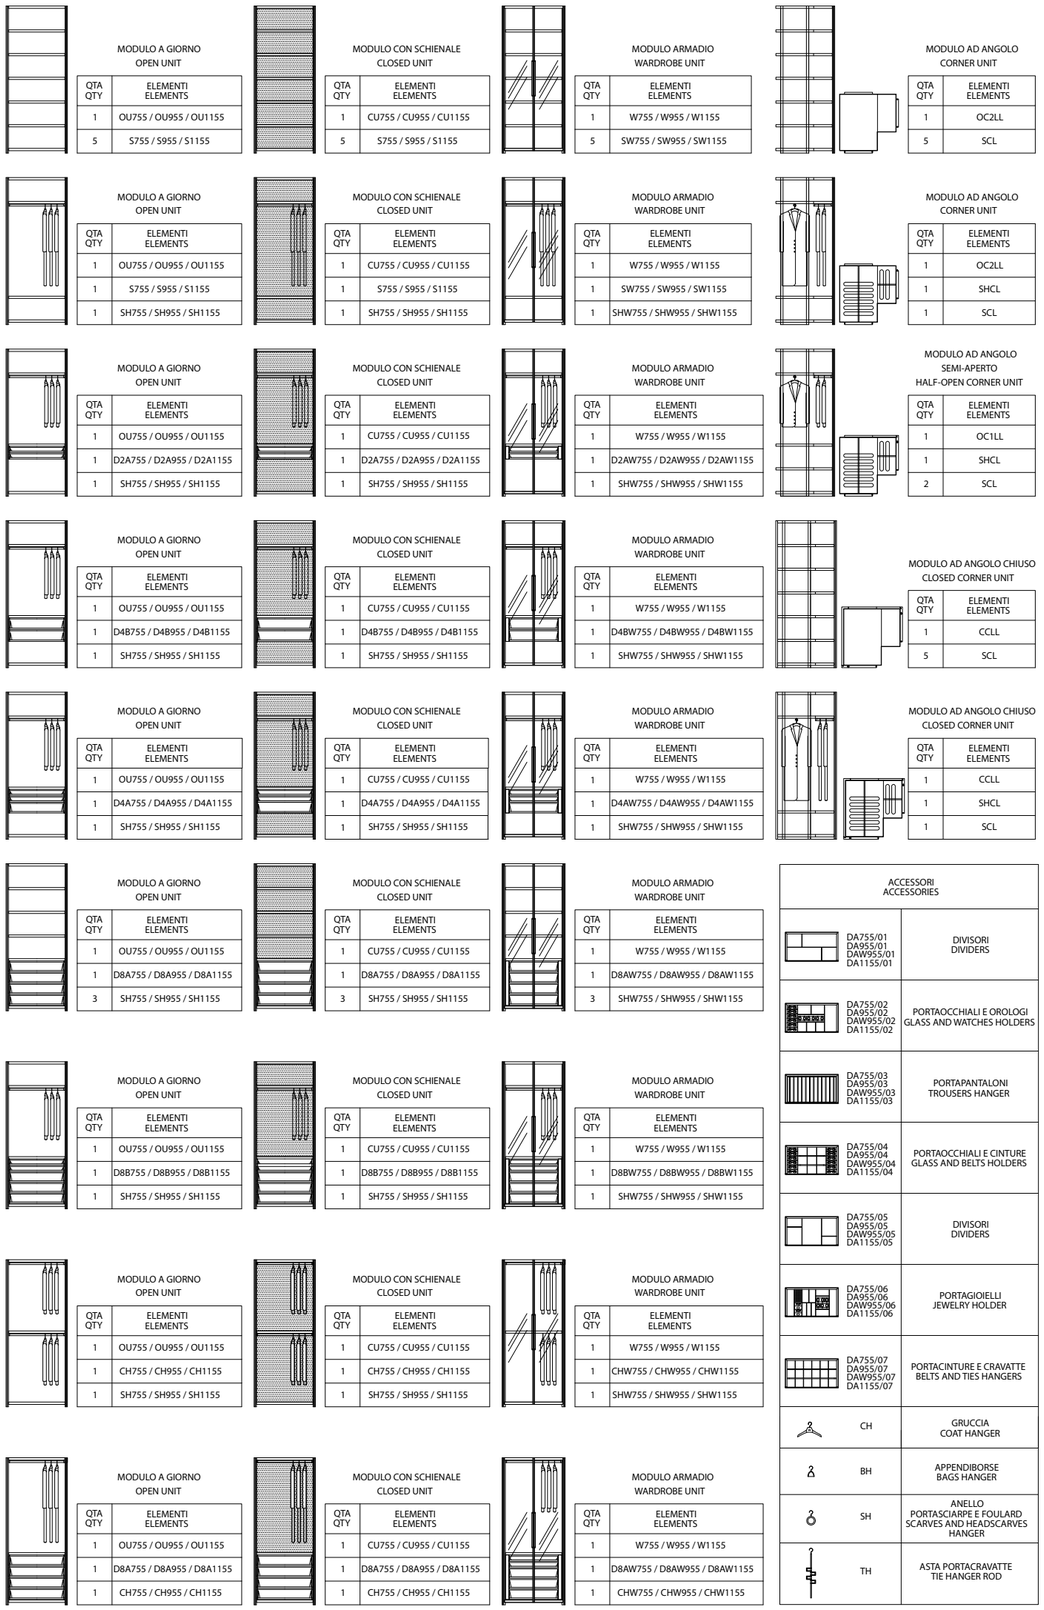

CONFIGURATION BASIC RULES

- Available only with a preliminary technical project
- Fixed depth (not customizable)
- Max height for open units 300 cm
- Expandable width only with open and closed units and shelves (not for closet - not for drawers)
- Max height for closet: 250 cm
- T compositions always need the 'closing sides kit'

BLOCCO CUCINA - WORKING AREA COMPOSITION

Alessandro La Spada

Struttura in legno. Rivestimento ante e pannelli in acciaio inox spazzolato lacca nikel nero, con profili decorativi e borchie di fissaggio in ottone anticato.
Finiture alternative:
- inox satinato naturale con fregio e borchia in ottone anticato;
- inox satinato lacca bronzo lucido con fregio e borchia in ottone anticato;
- legno laccato lucido ral 9005 con fregio e borchia in ottone anticato;
- legno laccato lucido perla “Ostrica” con fregio e borchia in ottone anticato;
- legno laccato lucido ral 7047 con fregio e borchie in ottone cromo satinato.

Maniglioni in ottone anticato. Pomelli del gas fresati personalizzati “Visionnaire” con finitura ottone e logo inciso, regolazione del gas elettronica. Angolari zoccolo ottone anticato. Ferramenta di complemento in ottone anticato.
Il Blocco cucina è allestito nella sequente configurazione:
- colonna laterale di sinistra con frigo e freezer;
- colonna laterale di destra: parte superiore: macchina caffè, scaldavivande e ripiani con illuminazione LED; parte inferiore: cestoni con scaldastoviglie; base di sinistra a cestoni con cassetti interni;
- base di destra con lavastoviglie;
- base centrale: lavello integrato al top in acciaio Aisi 304 con luce LED; rubinetto in acciaio e ottone personalizzato Visionnaire;
- elemento contenitore a cestoni. Vano di sinistra a cestone con cassetto interno portaposate in legno wengè massello. Vano di destra a cestoni con contenitori personalizzabili per la raccolta differenziata.

Barra sottopensile attrezzata con ganci e mensole per mestoli.

Structure in wood. Doors and panels covered of brushed stainless steel black nickel lacquered, with decorative outlines and fixing studs in antique brass.
Alternative finishes:
- satin stainless steel natural and frieze with antique brass stud;
- steel with satin lacquer polished bronze frieze and antiqued brass stud;
- RAL 9005 lacquered wood with decorative studs and antique brass;
- pearl “Ostrica” lacquered wood with decorative studs and antique brass;
- RAL 7047 lacquered wood with decorative studs and satin chrome brass.

Handles in antique brass. Hob knobs in milled antique brass with logo engraved. Milled hob knob personalized “Visionnaire” with brass finishing and logo engraved, electronic gas regulation. Complementary metalware in antique brass.
The working area composition is set in the following configuration:
- left column with fridge and freezer;
- right column is divided in upper part and lower part. The first one is composed of coffee machine, chafing dish and shelves with LED lightings and the other is composed of hamper-drawers; left base with internal hamper-drawers; right base with dishwasher;
- central base: Sink integrated to the top in stainless steel Aisi 304 with LED spot. Tap in steel and brass personalized “Visionnaire”;
- container element with big drawers: in the left part there is an internal flatware organizer compartment in solid wengè wood while in the right compartments there are hampers for recycle bins.

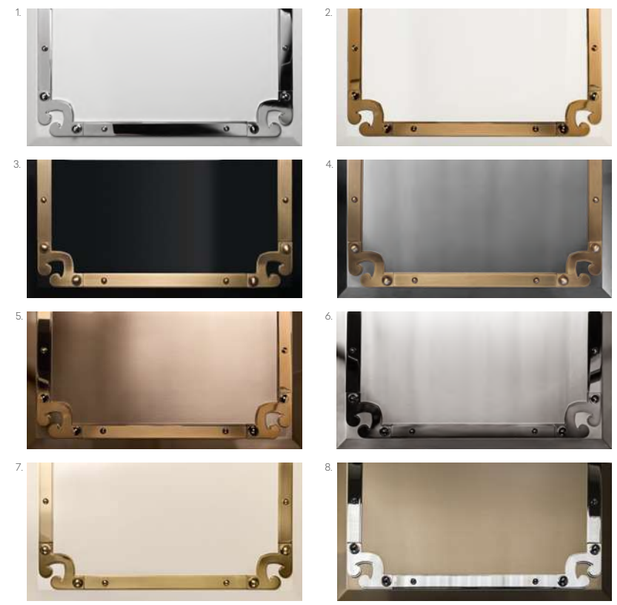

Shelves with hanging tubes for dashers and kitchen tools, in antique brass.

COLLEZIONE DEHORS
I mobili della collezione DEHORS VISIONNAIRE sono in generale adatti ad un uso in ambienti esterni non completamente esposti alle intemperie, posizionati in luoghi coperti, asciutti, areati e su pavimentazioni prive di umidità.
Per i mobili imbottiti, i rivestimenti disponibili sono presenti nel Campionario Dehors.
Le parti in metallo sono trattate per un utilizzo in ambienti esterni non completamente esposti alle intemperie, in caso di utilizzo su imbarcazioni o ambienti marini, l'ordine deve essere approvato dall'ufficio tecnico Visionnaire.

Alcuni prodotti costruiti in materiali particolarmente delicati quali rattan naturale, pelle, legno massello sono sconsigliati per un uso completamente esposto alle intemperie e richiedono cura e manutenzione particolari:

NORME GENERALI
- Posizionare gli articoli in ambiente protetto da copertura (es. tetto, gazebo, patio, ecc.);
- Non posizionare su terreno, erba o su qualsiasi altra superficie con alto tasso di umidità;
- Coprire con l'apposito telo impermeabile, in caso di pioggia e altre intemperie, accertandosi di mantenere comunque un'adeguata aerazione del prodotto;
- ATTENZIONE: non coprire i mobili con l'apposito telo impermeabile in caso di eccessiva umidità oppure dopo la pioggia, e comunque attendere una completa asciugatura del prodotto e del pavimento prima di applicare nuovamente il telo impermeabile.
- In previsione della stagione invernale o di un prolungato inutilizzo si raccomanda di ritirare i mobili in un luogo chiuso ed asciutto e/o coprire i mobili con l'apposito telo impermeabile.

Tutti gli articoli richiedono una pulizia periodica generica:
- su tutte le superfici, usare un panno umido al fine di asportare polveri o incrostazioni che nel lungo periodo possono corrodere le superfici metalliche, macchiare pelli e tessuti o creare alterazioni superficiali sugli articoli in legno/metallo;
- per le superfici imbottite si raccomanda di ravvivare i cuscini ed i rivestimenti (es. con battipanni o altri strumenti idonei).

TRATTAMENTO DEI MATERIALI
Per alcuni materiali, oltre alle norme generali, vanno seguite alcune precauzioni specifiche. Per questi vanno usati prodotti e trattamenti per la manutenzione ordinaria:

LEGNO
BOULEVARD – BRAMANTE - BREEZE – FARNESE - GALLOWAY – GREEN LIFE
Nella movimentazione e nella pulizia del prodotto, fare molta attenzione a non danneggiare la superficie del legno ed a non graffiare la pellicola lucida, poiché questa costituisce una protezione all'esposizione del prodotto nel lungo periodo e alla sua corretta manutenzione. Per una pulizia ordinaria: utilizzare un panno umido al fine di asportare polveri o incrostazioni che nel lungo periodo possono corrodere le superfici.

KATHRYN
Manutenzione delle parti in legno: ogni 6 mesi applicare OIL FOR DECKING generico seguendo le istruzioni per la posa.

CUOIO
Le componenti in cuoio per i modelli GREEN LIFE, BOULEVARD e GALLOWAY FREESTYLE richiedono uno specifico trattamento, da effettuarsi almeno ogni 6 mesi, passando un panno inumidito con olio naturale per trattamento pelli, seguendo le istruzioni allegate alla confezione del prodotto.

OUTDOOR COLLECTION
Furniture of DEHORS VISIONNAIRE collection are generally suitable for use in external locations not totally exposed to the weather, those shall be placed in covered, dry, airy areas, on flooring without humidity.
For padded furniture, suitable upholsteries are available in Dehors sample book.
Metal parts are treated for outdoor use in external locations not totally exposed to the weather, if those are to be used on vessels or marine environments, the order shall be approved by Visionnaire technical department.

Some products made in extremely delicate materials, such as natural wicker, leather, solid wood, are not suitable for outdoor use in locations totally exposed to weather and require a specific maintenance:

GENERAL INSTRUCTIONS
- Place the items in a location with a protective coverage (such as rooftop, gazebo, patio, and similar);
- Do not place on earth, grass or any other surface with high percentage of humidity;
- In case of rain or adverse weather conditions, cover furniture using the waterproof cover provided, making sure to enable adequate ventilation;
- ATTENTION: do not cover furniture with the waterproof cover provided in case of excessive humidity or after rain; always wait furniture and flooring are completely dry before using the waterproof cover.
- In view of forthcoming winter season or if leaving them unused for a long period of time, we recommend to store furniture in a closed and dry location and/or to cover them using the waterproof cover provided.

All furniture shall undergo regularly a thorough cleaning:
- On all surfaces, use a humid cloth to remove dust or scale residuals which may corrode leather surfaces over time, stain leather or fabric or cause superficial alterations of wood/metal surfaces;
- On padded furniture, we recommend to plump up cushions and restore upholstery (i.e. rug beater or similar suitable tools).

MATERIAL TREATMENT
Except above-mentioned general maintenance instructions, some materials require additional precautions to be used. In this case, specific products and treatments are to be used for their daily maintenance:

LEGNO
BOULEVARD – BRAMANTE - BREEZE – FARNESE - GALLOWAY – GREEN LIFE
When handling and cleaning these products, take care not to damage the wooden surface and not to scratch the shiny film over it, which works as protective cover from possible damages of prolonged exposition of the product and guarantees its correct maintenance. Daily maintenance instructions: use a humid cloth to remove dust and scale residuals which may corrode the surface over time.

KATHRYN
Maintenance of wooden parts: every 6 months apply generic OIL FOR DECKING following application instructions.

EMERY LEATHER
Components of GREEN LIFE, BOULEVARD and GALLOWAY upholstered in emery leather require a specific treatment, to be made every 6 months, rubbing on them a humid cloth with natural oil for leather treatment, following application instructions provided in the packaging.

Hand-blown crystal ampoules, laid on internally honed basins and externally structured in hand crafted Brown Fantasy marble.

click here

SEDIMENTO

"Sedimento", è un tributo all'inestimabile patrimonio di sapienza artigiana tipica del territorio italiano coniugato alla capacità creativa e di riflessione in chiave contemporanea.
La storia, nel susseguirsi di date e di eventi è anche il rincorrersi di forme, di contenitori, di vasi che testimoniano il passare di mode, costumi e attività. La ceramica è depositaria di questo archivio e i lavori contenuti in "Sedimento", vi alludono, pescando dalle sue profondità per restituire assemblaggi e forme nuove. Sedimenti sono frutto di accumulazioni di maioliche fuse ad alta temperatura che attraverso smalti e cristalline sono uniti in modo indissolubile formando vasi da fiori, consolle tavolini o trofei.

Misure e colori potrebbero leggermente variare da creazione a creazione. La particolarità delle lavorazioni rendono ogni opera "pezzo unico".

"Sedimento", pays homage to the extraordinary legacy of craftsmanship found in the Italian territory, combined with creativity and reflection with a contemporary viewpoint.
History, in the succession of dates and events, is also a parade of forms, containers, vases that bear witness to the passage of fashions, customs and activities. The art of ceramics is a repository of this gigantic archive, and the works contained in "Sedimento" allude to this heritage, delving into its depths to discover compositions and new forms. Sediments are the result of accumulations of majolicas casted at high temperatures that are indissolubly united through glazes and crystallines forming flower pots, consoles tables or trophies.

Sizes and colours may vary slightly from creation to creation. The particularity of the workmanship makes each piece "unique".

$CaCO_3$

Il collettivo artistico dei CaCO3 conduce una rigorosa ricerca che mette in scena molteplici e inedite riformulazioni del linguaggio del mosaico nella contemporaneità.
Le opere si presentano come superfici mosse e vibratili di tessere in vetro, talvolta colorato o inglobante la foglia d'oro, oppure in marmo o gesso. I tasselli sono disposti manualmente in uno strato di malta cementizia fresca, addizionata con ossido per ottenere diverse sfumature cromatiche. Il loro diverso configurarsi, mediante il mutare dell'inclinazione con cui sono inserite nella malta di supporto, genera con la luce effetti molteplici, di movimento, di rotazione, di modularità, di pulsazione, rendendo queste opere uniche e vive.

The CaCO3 artistic collective conducts a rigorous research that stages multiple and unedited reformulations of the mosaic language in the contemporary world.
The works are presented as moving and vibrating surfaces of glass tiles, sometimes colored or incorporating gold leaf, or marble or plaster. The anchors are disposed manually in a layer of fresh cement mortar, added with oxide in order to obtain different chromatic nuances. Their different configurations, by changing the inclination with which they are inserted in the support mortar, generates multiple light effects, of movement, rotation, modularity, pulsation, making these art works unique and alive.

MOVIMENTI

La serie "Movimento", nasce per evidenziare il rapporto luce/materia. In particolare, nei mosaici di pasta vitrea con foglia d'oro, la luce impalpabile scivola e penetra nella materia scomponendosi e ricomponendosi nella frammentazione musiva, dando la sensazione di una dimensione altra o profonda che porta la percezione in uno stato contemplativo.

The "Movimento" series was created to highlight the relationship between light and material. In particular, in the glass paste mosaics with gold leaf, the impalpable light slips and penetrates the material, breaking down and recomposing itself in the mosaic fragmentation, giving the sensation of another dimensions, a profound dimension that brings perception into a contemplative state.

CATTEDRALI

Nelle opere "Cattedrale", tutte realizzate con il vetro utilizzato per le vetrate artistiche delle chiese medievali, viene amplificato il rapporto simbiotico tra le diverse stratificazioni di un mosaico: se nelle vetrate medievali la trasparenza del vetro viene attraversata dalla luce trasfigurandola, in questo gruppo di opere il colore delsottofondo (affresco) attraversa il vetro trasparente delle migliaia di tessere colorate e si fonde con esso nell'occhio di chi guarda, oltrepassando così i limiti dello spazio interstiziale in cui era tradizionalmente relegato.

The "Cattedrale" artworks are made with the same glass used for the stained glass windows of medieval churches. In these artworks, the symbiotic relationship between the different layers of a mosaic is amplified: while in the medieval windows the transparency of the glass is crossed by the light transfiguring it, in this group of artworks the color of the background (fresco) crosses the transparent glass of the thousands colored tiles and merges with it in the eye of the beholder, thus going beyond the limits of the interstitial space in which it was traditionally relegated.

SOFFI

Le opere della serie “Soffi” vengono sottoposte ad una sabbiatura superficiale che produce un’accelerazione di quel processo naturale di deterioramento che rende la materia viva e allo stesso tempo affascinante. Le superfici vetrose in cui si alternano stratificazioni opacizzate a quelle rilucenti diventano così spazi eterei; le superfici musive in calcare, levigate e plasmate dal soffio della sabbiatura, diventano propaggini organiche.

The artworks of the “Soffio” series are subjected to surface sandblasting that accelerates the natural process of deterioration that makes the material alive and fascinating at the same time. The glassy surfaces in which matt and shiny layers alternate become so ethereal spaces in which to immerse sensorially; the mosaic surfaces in limestone, smoothed and shaped by the breath of sandblasting, become organic offshoots like a call to life.

MICHELE ASTOLFI

Appassionato di fotografia e di elaborazione digitale Astolfi sperimenta la combinazioni tra l'immagine e diversi materiali come legno fossile, cristalli, madreperla, pietra naturale e acciaio. La ricerca più recente lo avvicina al trattamento pittorico della materia utilizzata rendendo labile il confine tra unicità dell' opera "gioiello" e la sua replicabilità.

Passionate about photography and digital processing, Michele Astolfi experiments the combination between image and different materials such as fossil wood, crystals, mother of pearl, natural stone and steel. The most recent research brings him closer to the pictorial treatment of the used material, making the border between the uniqueness of the "jewel" work and its replicability blurred.

WINNER 2020

PAVONE

TRONO - THRONE

Marc Ange

Trono in pelle o tessuto, scocca in ottone e acciaio, braccioli e schienale composti da una corolla di elementi in ottone fuso e lucidato a mano con cuscinetti imbottiti e rivestiti. Elementi decorativi retro schienale in ottone curvato e lucidato a mano con cuscinetti imbottiti. Seduta e poggiareni in poliuretano a densità differenziate e falda acrilica. Basamento in legno rivestito in pelle e base in metallo cromato. Le parti in metallo sono disponibili nella selezione finiture metalliche.

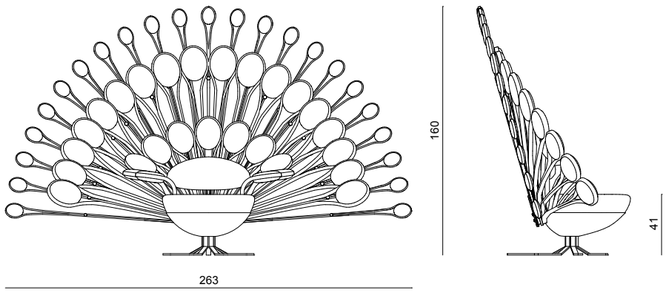

Throne in leather or fabric, external structure in brass and steel, armrests and backrest consist of elements shaped like a corolla of petals, made in cast brass with hand-polished finish and with upholstered pads. Decorative elements behind the backrest made in curved brass with hand-polished finish and equipped with upholstered pads. Seat and small back cushion padded in polyurethane foam with different densities and acrylic fibre. Lower seat structure in wood, covered in leather, and base in chromed metal. Metal parts can be lacquered in any colour included in the metal finish selection.

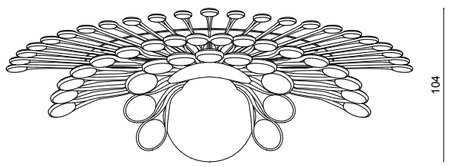

Pezzo unico in 3 varianti cromatiche.

Unique piece in 3 color variants.

Winner of the 2020 Archiproducts Design Awards, “Furniture” category

Creatività, sostenibilità e meta-luxury.
La Re-Evolution dal cuore verde di Visionnaire passa anche dalla realizzazione di questo catalogo che unisce il valore storico dell'italianità del brand alla green consciousness. L'intero catalogo è stampato su carte ricavate da fonti gestite in maniera responsabile.

Creativity, sustainability and meta-luxury.
Visionnaire green-hearted re-evolution hits also the production of this catalogue, in which the long standing value of the company for made-in-Italy melts with the concept of green consciousness. The catalogue is printed on paper obtained from responsibly managed sources.
