

HESSENTIA

CORNELIO CAPPELLINI

50’S inspiration.
Geometric volumes.

Bloom sofa.

Bloom sofa is an expression of soft and geometric volumes, capable of giving each piece a contemporary look. The elegant shapes are inspired by the 1950s design.

OLIVER.2100 Armchair

Artistic pottery.

The artistic working process of pottery is a distinctive feature of Cornelio Cappellini's multi-material approach to the choice of materials. Each piece, after being moulded with extraordinary artistic skill, is dried and put into the oven for the first baking that determines the hardening of the raw material. A second baking process defines the final colour, creating unique pieces always different from each other.

BLOOM.2150 Armchair

NOVA.2100 Wall lamp **BLOOM.2150** Armchair

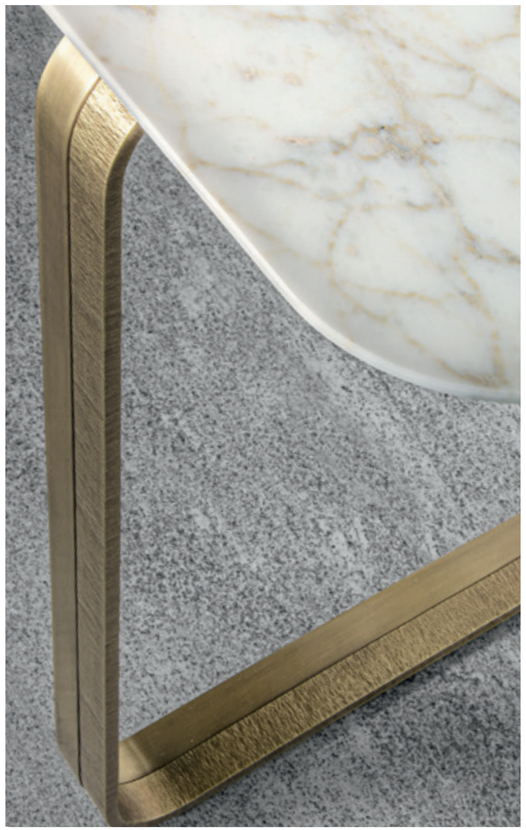

Nova modular bookcase.

Nova modular bookcase is customizable in finishes and dimensions. It can be considered as a completely "tailored" product, which can be designed selecting different kinds of marbles, metals, woods and leathers. This modular day system is the expression of a design that is both refined and elegant. Each composition is characterized by open compartments of different sizes, while the functional sliding doors have been chosen as door opening system.

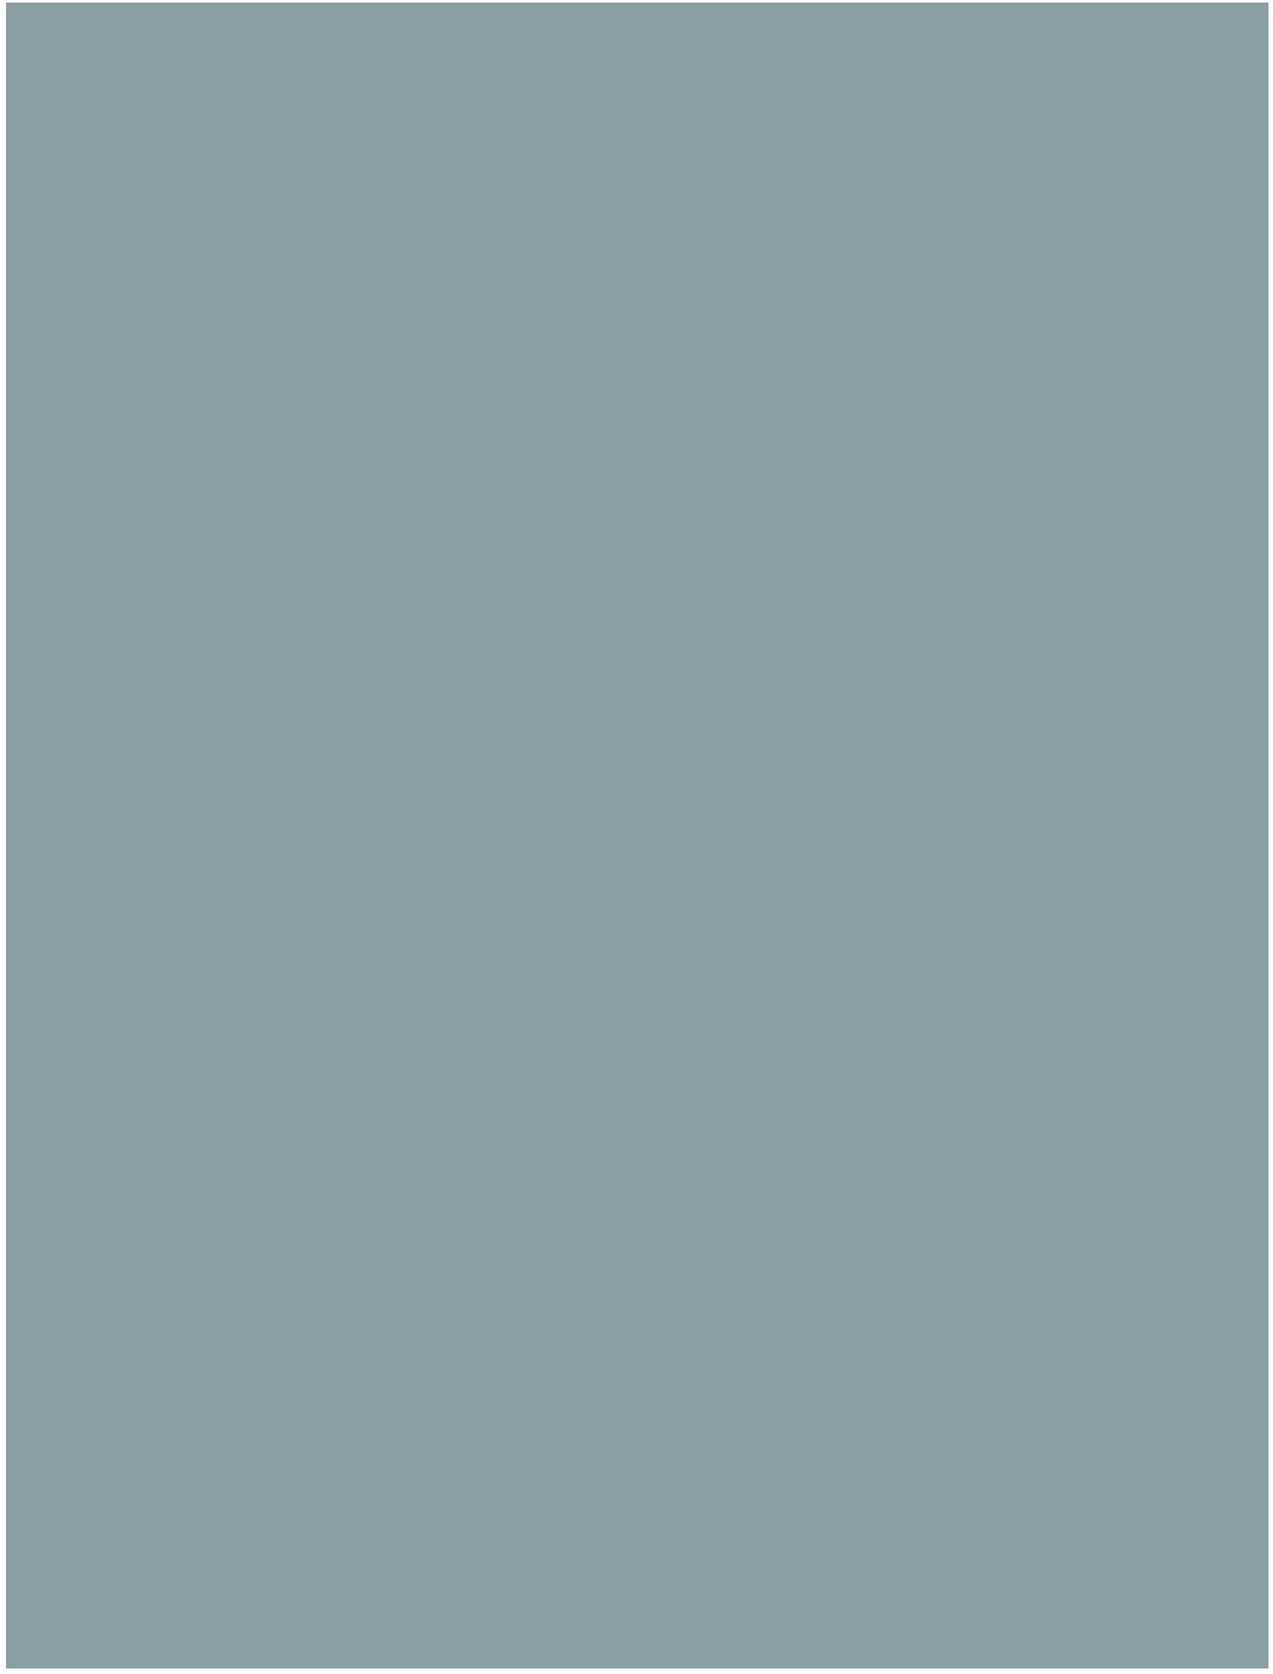

NOVA.10100 Console

Brass ribbon.
Lazy susan.

Nova table.

The uniqueness of Nova table is represented by the brass base that envelops the marble slabs like a ribbon, enhancing the natural veins of the stone. The metal parts, which are shaped in a very precious way, are proposed both in shiny and matt finishes and some of them are decorated by hand with a refined three-dimensional effect.

NOVA.5180 Table

Brass.

The metals used for Hessentia collection, such as brass, have assumed an ever-increasing decorative role. The craftsman-artist succeeded in sculpting the typical austerity of metal, making the structure lighter and more elegant.

Tailoring stitching.
Suspension games.

Nova bed is an innovative and sophisticated proposal for the bedroom: the wide headboard upholstered in leather and enriched by metal inserts, perfectly includes two night tables which are suspended thanks to a metal profile integrated with a led lighting system. Nova bed is also available in the version with two free-standing night tables.

NOVABED.5180/C Bed

NOVA.9100 Drawer unit

NOVA.26000 Walk-in closet

Nova walk-in closet.

Nova walk-in closets perfectly express the concept of modular cabinets, which are realized completely "to measure". Their design is refined and has a great aesthetic impact, but it is at the same time functional. For the closed parts, a sliding door system has been chosen to express greater functionality. The accuracy of the details is clearly visible on the doors, which are decorated with a bas-relief square pattern and then completely upholstered in leather. Nova walk-in closet is the perfect example of the multi-material approach of the company: eucalyptus wood, metal, leather and a wide selection of marbles can be chosen for its realization.

NOVA.26000 Walk-in closet

Leather.

Nabuk is a full grain leather that, thanks to a special process, develops a typical suede effect with a velvet touch. Softness is the main feature of this leather, which is rigorously tanned in Italy. It passes through a grinding phase, a sort of peeling process, which smooths the surface preparing it for the dyeing. Then the leather is aniline-dyed through a special treatment called "passante", since the colour is completely absorbed. Sometimes the surface is not uniform and this characteristic has to be considered an exclusive peculiarity for everyone who can appreciate its value.

Geometric patterns.
Comfort at home.

Decorated with soft three-dimensional quiltings with rhomboid pattern that underline great sartorial skills, Hug collection includes armchairs, beds and sofas in different sizes, available both in leather and fabric.

Hug sofa.

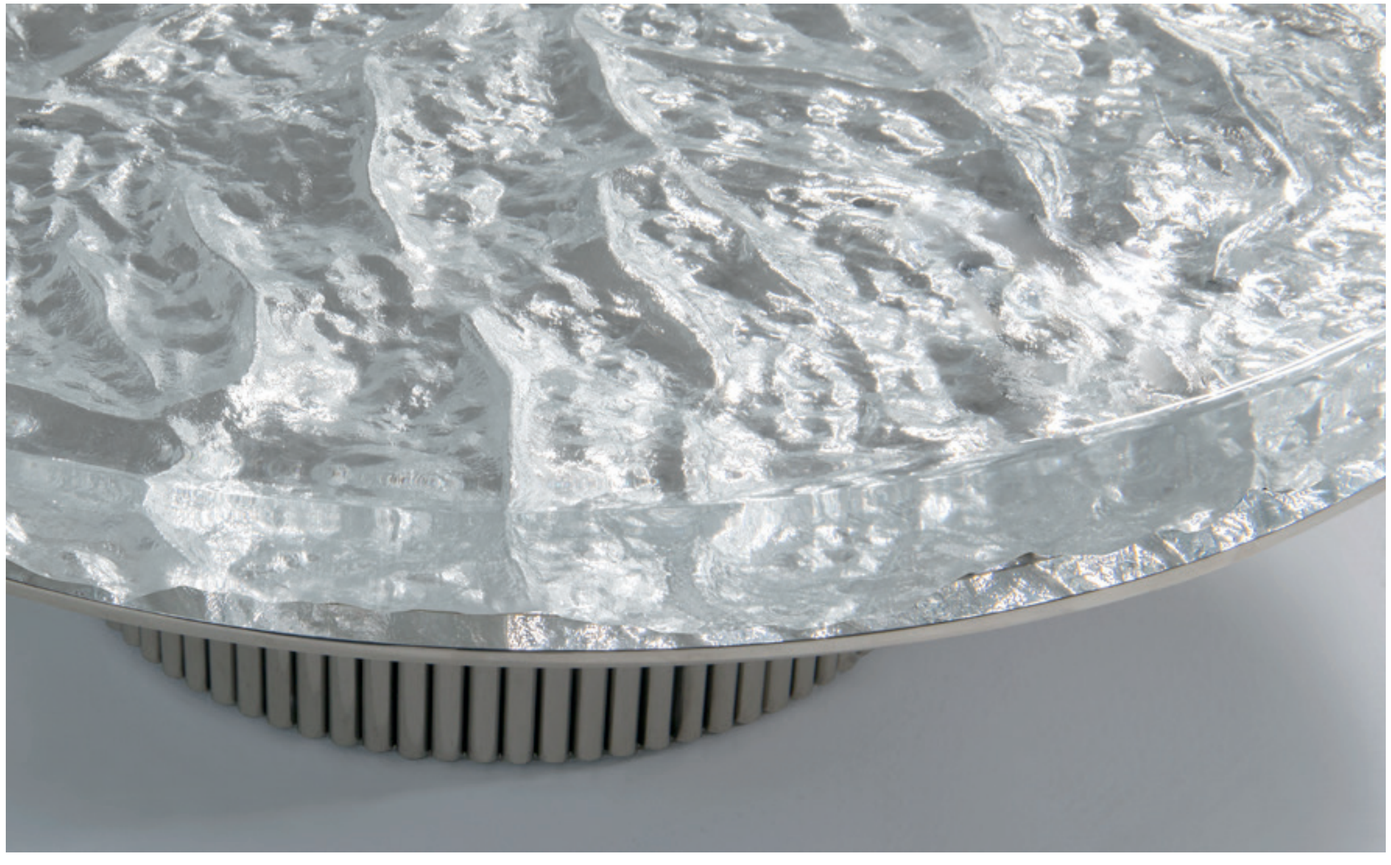

HUG.2400/TR Sofa **PEDRO.1040** Side table **MILLER.1060/A/HE** Side table **HUG.2400** Sofa **HERON.3300** Floor lamp **EVELYN.2100** Armchair **MILLER.1154/HE** Coffee table **MILLER.1060/B/MA** Coffee table **ASTRO.1300** Chandelier **STRUCTURE** Artwork **CHRIS.250350/R5** Rug

Embroidery decoration.

Embroidery is the craft of recreating decorative designs upon different types of fabrics or leathers using needle and threads. In the past this difficult decoration was entrusted to the expert "hands" of a tailor, while today it is realized through extremely sophisticated automatic machines, which are able to reproduce the most complex motif. The soft rhomboid embossed embroidery that characterizes sofas and armchairs of Hug collection is the perfect expression of Cornelio Cappellini great tailoring skills.

Open book marble.
Sinuous shapes.

Adone table.

Sophisticated and refined, the table Adone is an elegant protagonist of the dining area. The precious materials used for its realization are further enhanced thanks to the harmonious sinuous shapes. The top, rounded at the ends, is a slab of marble with a metal profile. In larger sizes, the two-pieces division of the top becomes even more interesting thanks to the game of symmetries commonly called "open book". The metal base supports four elements finely covered in leather and engraved both vertically and horizontally.

ADONE.8320 Table **EVELYN.1040** Chair **NOVA.13400** Storage unit **SHADE.1400** Chandelier **TWINE** Wall panels system

ADONE.8320 Table **EVELYN.1040** Chair

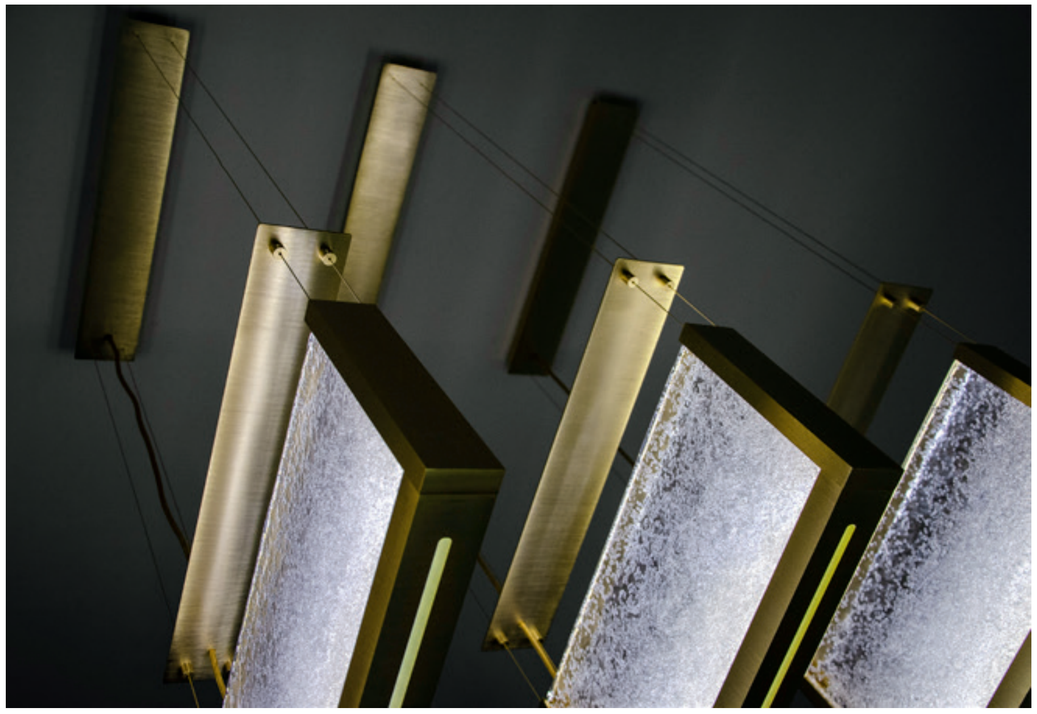

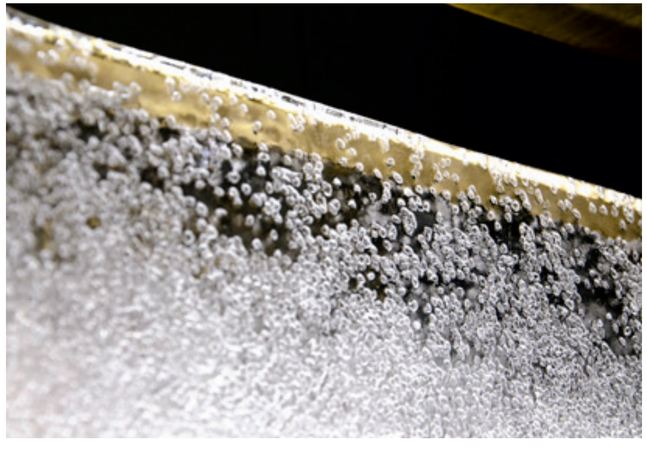

Ocean Storm Marble.

Each slab of this amazing marble has unique patterns and colour shades rarely seen among marble stones. The swirled veins are accentuated by dark and light tones of grey and charcoal. It displays irregular veins ranging from blue to gold, from white to all tones of grey.

ADONE.8320 Table

SHADE.1400 Chandelier

ADONE.8320 Table **EVELYN.1040** Chair **SHADE.1400** Chandelier **TWINE** Wall panels system

Twine wall panels system.

Twine wall panels system takes inspiration from "Art Deco" period. A set of panels with a rounded surface, with parallel stripes pattern, creates a geometric decoration fully customizable even in size. Through its "master decorators", Cornelio Cappellini continues to offer its own interpretation in the use of resin combined with other materials. In Twine wall panels the resin-based finishing process plays a dual role, inspiring both preciousness and harmony. Each element is always different from the previous ones.

Parallel lines.
Elegance feeling.

Bridge storage unit.

Bridge storage unit has a contemporary look thanks to its horizontal lines with rounded corners: the mother of pearl lacquered enhances its brilliance becoming a suitable element for contemporary environments. The brushed metal parts that cover the internal side of this storage unit represent the main characteristic of the structure and, together with the "open-book" marble top, it conveys a sophisticated elegance feeling.

Unconventional.
Unique.

Miller table.

Miller collections come from the exclusive cooperation with the Masters of glass art in the Venice area. This table represents the perfect result of the ability of these craftmen-artists, who learnt the ancient Murano glass working techniques and have handed them down from generation to generation. The glass top is supported by three cylindrical legs covered with thin chrome metal rods.

MILLER.5154/HE Table **OLIVER.1040** Armchair

Artistic glass.

The glass top was born of the desire to test a completely unconventional product, reinterpreting a millennial tradition in a modern key. The production difficulties of the casting process aimed at obtaining a large and thick glass top, make this piece a truly unique artwork. The surface of the table top, smooth to the touch, elegantly contrasts with the ripples of the lower part.

MORGAN.13400 Storage unit **VESSEL** Artwork

Decorative.
Engraving marble.

Linfa drawer unit.

Linfa is an example of combination of different materials able to enhance preciousness to this piece of furniture: marble inserts become drawer frontals that match with the rounded lacquered structure while metal parts become decorative details that separate the marble from the structure itself. It is highly recommended for bedrooms but it is also suitable for villas or flats where design and refinement of materials merge to highlight a modern and elegant look.

LINFA.9100 Drawer unit

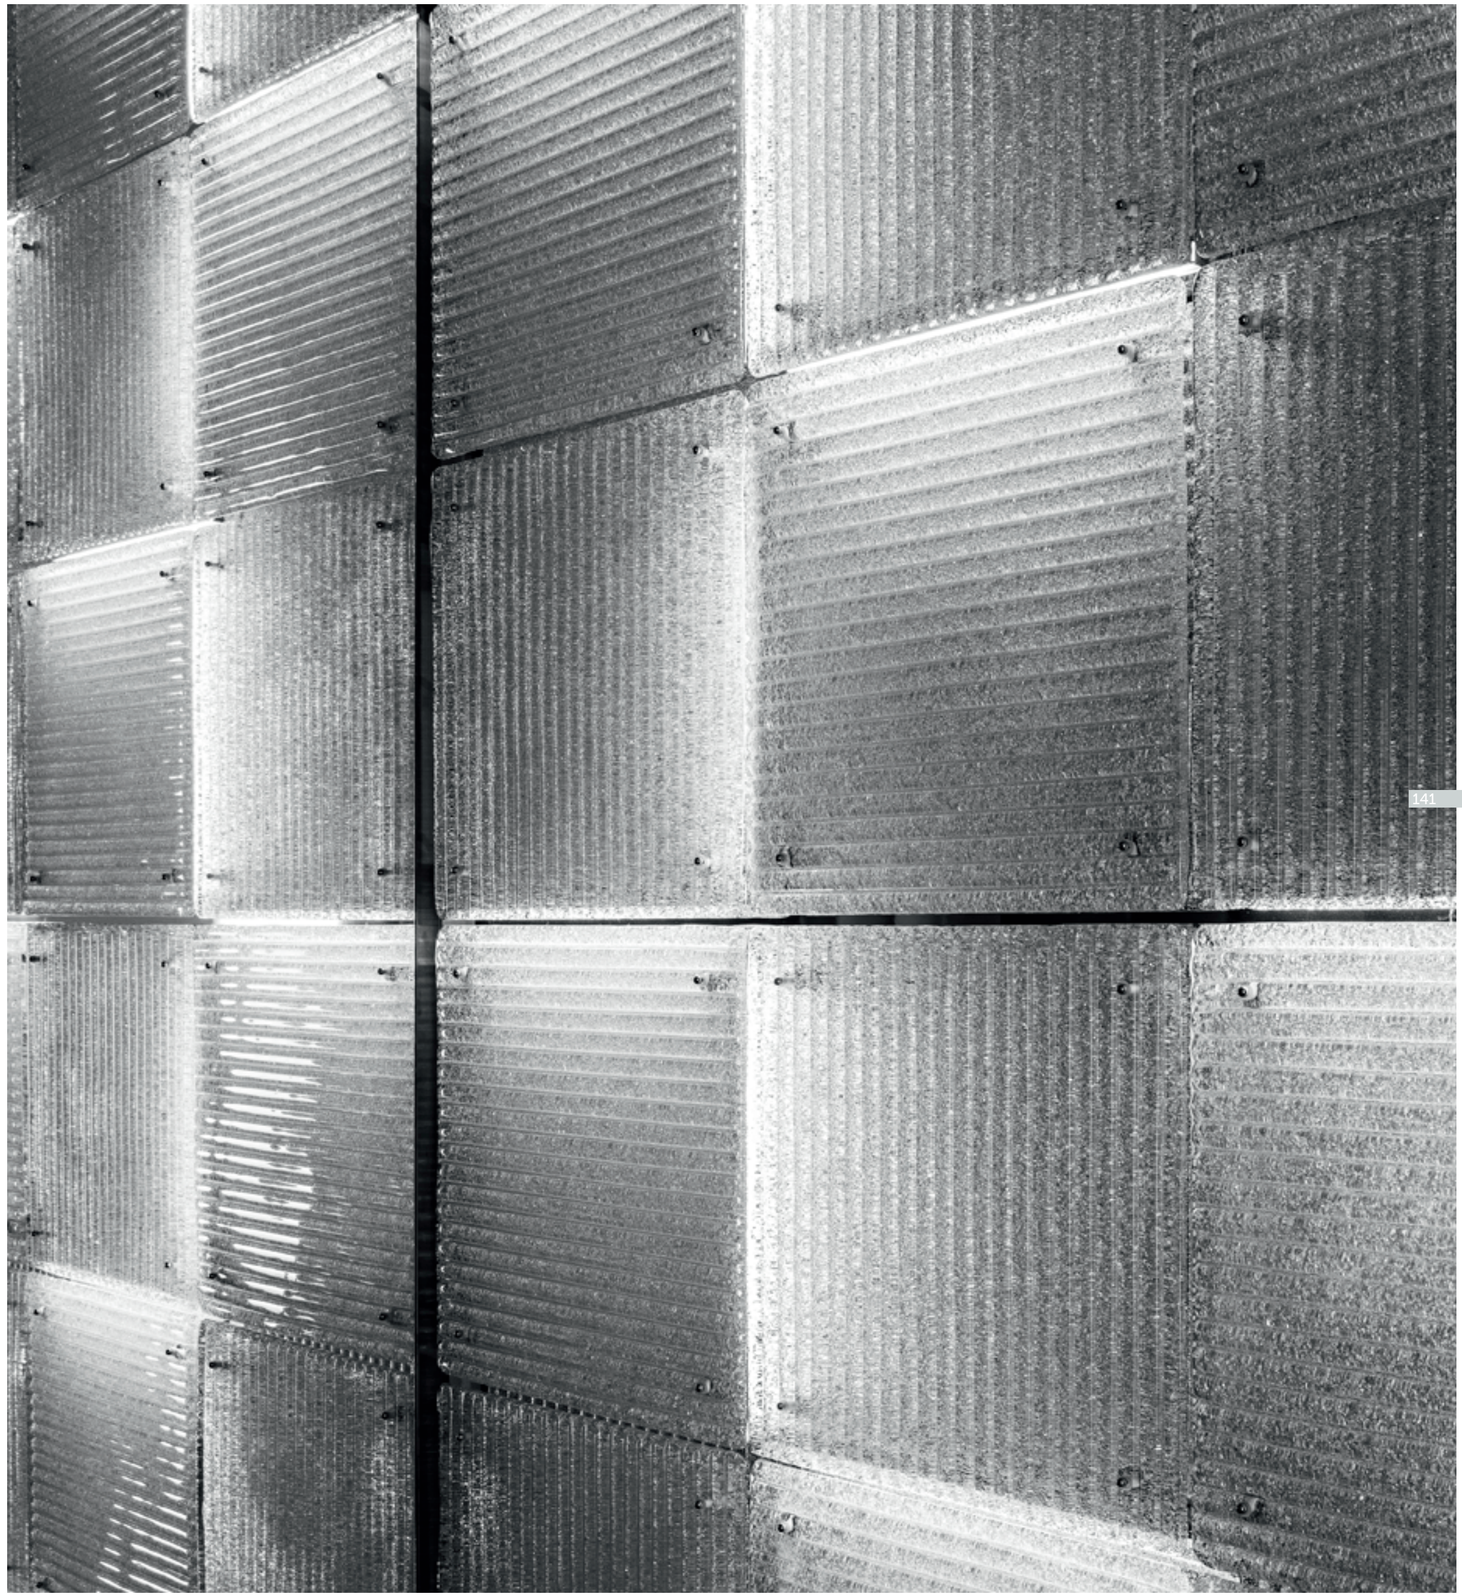

NOVA.12100 Vanity **HUG.1040/TR** Pouf **LUMEN** Wall light system

Lumen wall light system.

Lumen is the name of a lightened wall, consisting of several glass elements which have been poured into plate by master glassmakers. Being handmade, each element is always different from the previous one and it is lightened by Led strip located both vertically and horizontally to create a unique atmosphere. The design of this product is inspired by "Programmed Art", an art movement of the 1960s in which the artwork was realized through the repetition of visual patterns placed in different directions.

Exclusive stitching.
Soft and square shapes.

Rubik sofa.

Rubik sofas are the result of a detailed study of sophisticated high-quality details. This collection shows a contemporary style with classical inspiration expressed by harmonious volumes and exclusive stitching. The elegant metal base in shiny chrome finish enhances its aesthetic precision.

RUBIK.2400 Sofa

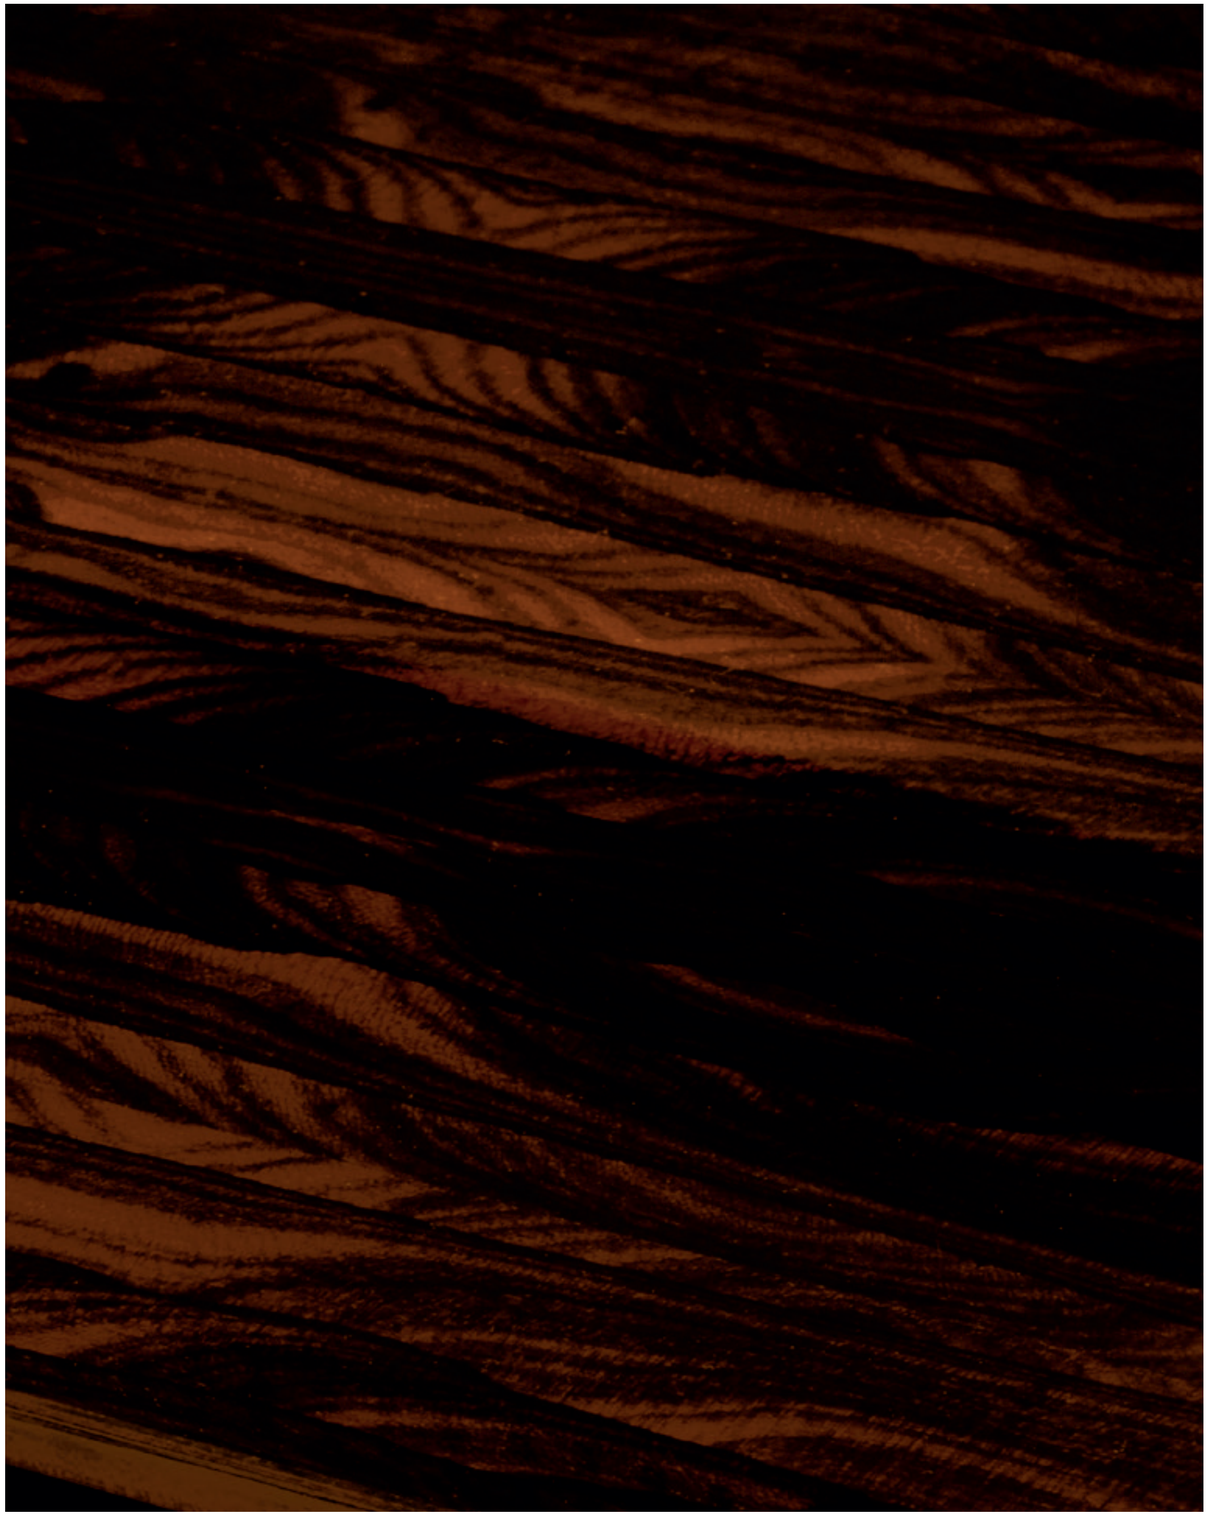

HARBOUR.13400 Storage unit

Ziricote wood.

Typical of Central America, Ziricote is an extremely valuable wood. It is mainly used for the production of musical instruments such as pianos, and it is characterized by its veins of dark and light shades, that sometimes combine with yellow tones. These veins are extremely decorative because they generally follow the natural curves of the wood. The high cost due to the rarity of this wood means that it is only used for high quality furniture, such as Harbour storage unit.

Patagonia marble.

Patagonia quartzite is one of the most particular and scenic stones in nature. This stone presents an extraordinary combination of shapes and colours: spots of white, black, beige and brown alternate with parts of translucent grey quartz and crossed by golden veins. This variety of elements within Patagonia quartzite is the result of different rocks and minerals that formed in the past millennia. It is a stone of volcanic origin, caved mainly in South America, which has crystalline effects related to the sudden cooling of magma as it rises to the surface.

PAULINE.2100 Armchair

PAULINE.2100 Armchair

Saddle leather.

Saddle leather is a kind of leather that has a great thickness, up to 2/3 millimetres, and it is characterized by a remarkable hardness. In the past, saddle leather was widely used for the production of many saddlery items and only recently it has been used in furniture manufacturing. This material is used as a rigid and at the same time flexible support of the back cushion of Pauline armchair. The twine motif and the stitching recall the working techniques of saddlery items.

RUBIK.2400 Sofa **HERON.1040** Side table **ECLIPSE.14700** Modular bookcase **VESSEL** Artwork

HERON.1040 Side table

Poplar root wood.

Poplar root is a fine wood that can be found at the base of the tree, between the root and the trunk. It develops without needing much light, therefore it is often found in sandy and marshy soils. It is a light colour wood, poorly resistant to moisture and it has a twisted appearance. In past centuries this wood has been widely used to make neoclassical furniture, later in recent decades it has been completely forgotten by the masters-craftsmen. The designers of Cornelio Cappellini have rediscovered this material and, through a "puzzle " working technique, they have given it a new interpretation in a modern key. It comes mainly from Eastern Europe and North America.

ECLIPSE.14700 Modular bookcase **VESSEL** Artwork

Three-dimensionality.
Leather upholstery.

Morgan storage unit.

Morgan storage unit represents an interesting proposal for the dining area. Its doors are shaped three-dimensionally with vertical decorative motif and upholstered in leather. The handle of the central door consists of a single cylindrical element placed on the centre of the storage unit, while the side doors can be opened by pulling an elegant metal detail on the upper profile of each door. Metal plays not only an aesthetic and functional role of door finishing, but it is also present in the two base elements. Finally, the marble top has a lowered edge to ensure an almost suspended effect compared to the underlying metal.

Essential.
Square shapes.

Vision sofa.

Vision modular sofa is an attractive proposal for fans of square shapes. This item with an essential but sophisticated design makes geometric simplicity its strength, expressing modernity and harmony of proportions. The various available modules allow to create many customised combinations, in order to meet the needs of each customer. The structure of Vision elements has a square section that is completely upholstered with soft fabrics or leathers, obtaining a perfect balance of volumes, where soft pillows ensure a pleasant sense of relaxation. The external structure of the sofa is accurately upholstered using a sophisticated technique that allows to cover each individual panel without seams.

HUG.2100 Armchair **MILLER.1060/A/HE** Side table **OTTO** Wall panels system

Otto wall panels system.

The decoration technique used for Otto modular wall is expression of artistic skills. A very thin sheet of metal is molded on the surface of each panel, decorated with Beam drawings, interrupted diagonally. The three-dimensionality of the surfaces is emphasized by a chromatic effect in transparency, that intensifies in some parts of the grooves. The design and dimensions of Otto wall are fully customizable.

HUG.2100 Armchair

Quilted.
Sculpture decoration.

Oliver is a piece that recalls the style of the 50s. The whole seat is wrapped in a diamond-shaped quilting that gives the surfaces a three-dimensional light-and-dark effect. The structure supporting the seat is made up of two metal ribbons which, embellished by hand-made sculptural work, create a pleasant aesthetic effect. This armchair is customizable with upholstery in leather or fabric as well as in the chromatic metal finishes.

RUG COLLECTION

Chris | Design Luca Erba - 2019

Rug

CHRIS.250350/R3

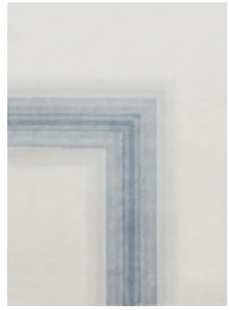

350
138

250
98 ½

Rectangular rug Chris with geometric pattern is made in Italy through automated tufting machines, using pure virgin wool yarn from New Zeland. The suggested size is 250 x 350 cm. In the first period of trampling, rugs made of natural fibres can release a slight fluff due to excess yarn. This does not represent a defect in manufacturing or yarn quality, being an effect that normally occurs.

CHRIS.250350/R5

WALL LIGHT SYSTEM

WALK-IN CLOSET

Eclipse | Design Claudio Cappellini - 2017

Modular bookcase

Eclipse is a modular bookcase characterised by a refined elliptical-shaped structure that envelops the shelves supported by decorative metal details. Its contemporary design is enhanced by precious woods, such as poplar root with "puzzle" working technique. It's also possible to select other materials like ebony or oak wood. Customizations in sizes are available on demand.

Lumen | Design Claudio Cappellini - 2019

Wall light system

LUMEN

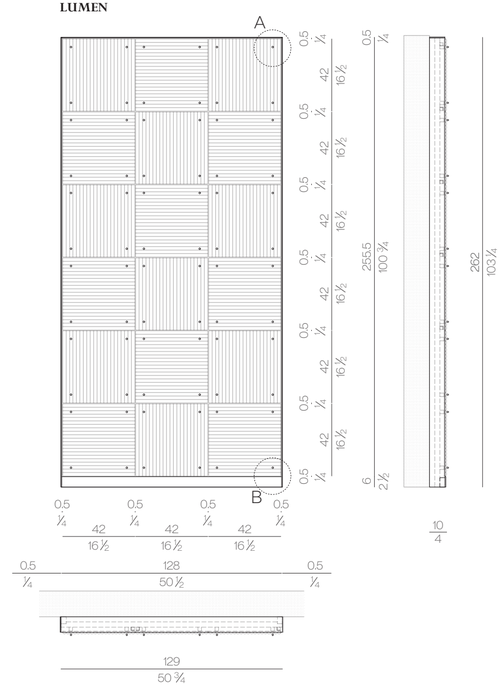

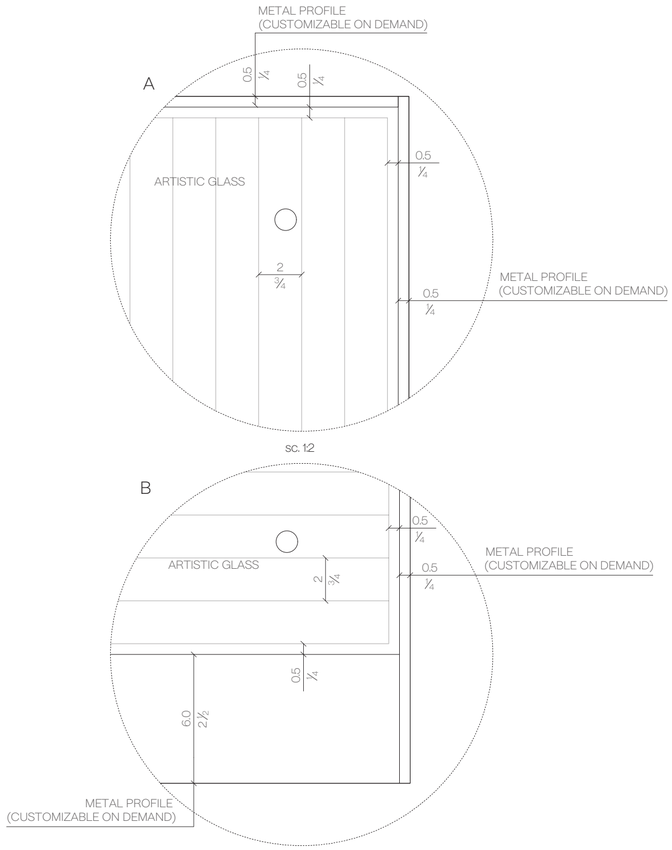

Lumen wall light system is composed of a series of artistic glass elements realized by master glassmakers in Venice area. The wall size can be customized both in width and height, always following the multiple of each glass element dimension, which is about 42 x 42 cm. Considering the high value of handmade craftmanship in the glass casting in plates process, each piece will always be slightly different from the others. For the assembling, it will be provided a panel to be fixed to the wall, together with another panel equipped with the electrical system. For technical reasons Lumen wall light system is supplied with four perimeter metal closing profiles, to protect the artistic glass. These closing profiles can be customized in size, according to the specific needs of the customer. Each individual glass element is locked with four decorative screws placed near the edges.

Walk-in closet

NOVA.26000

Nova | Design Luca Erba - 2019

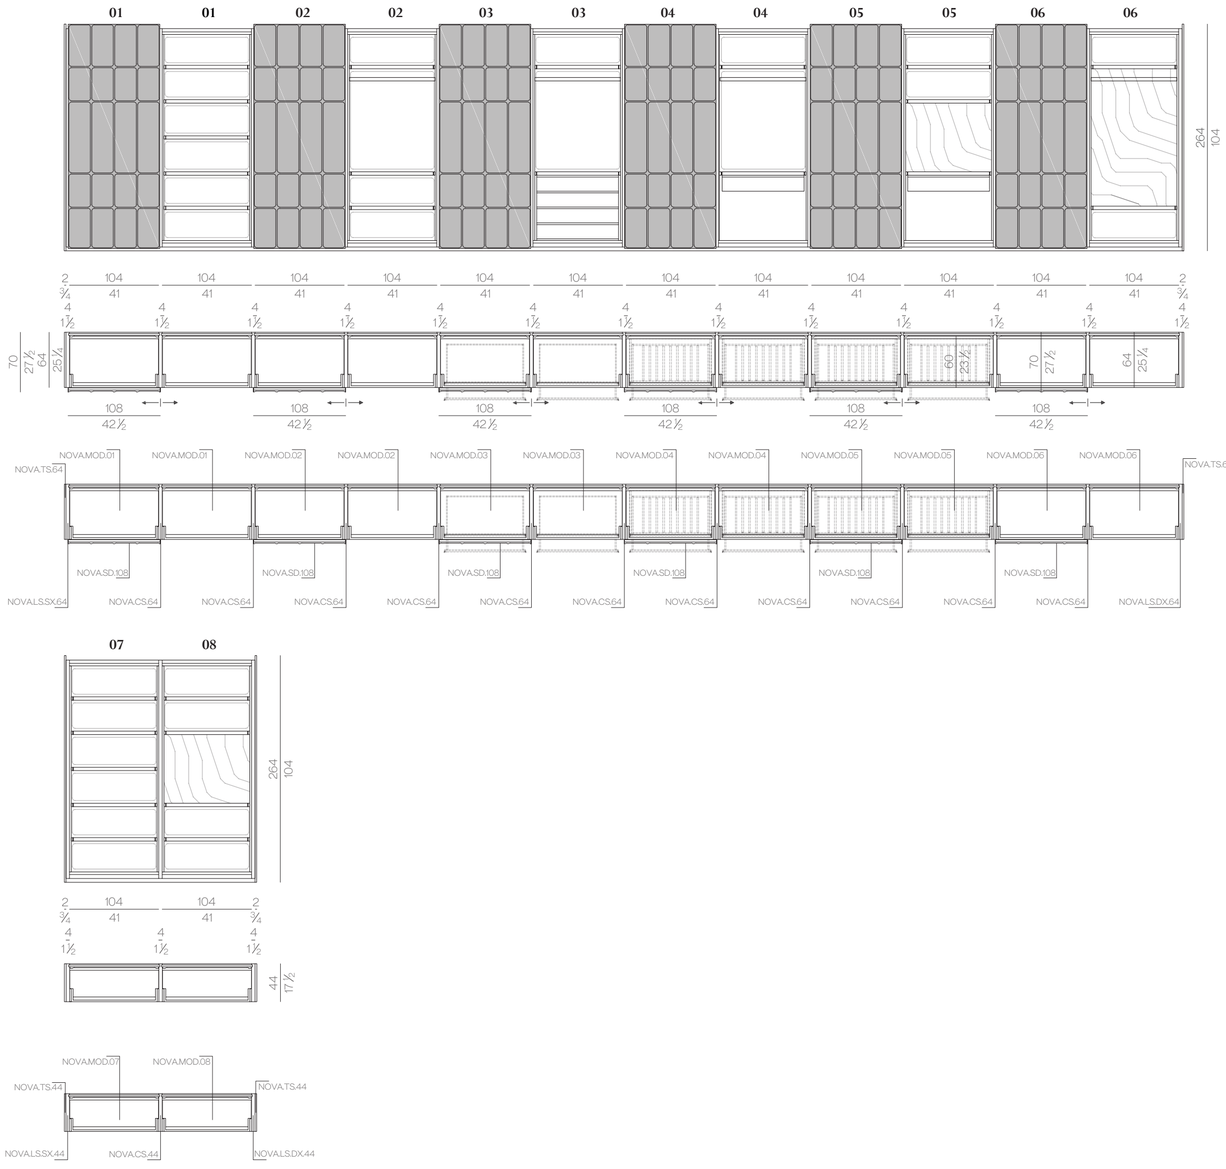

Nova walk-in closet is available with modules intended for different functional purposes thanks to the presence of shelves, drawers and hangers. The modules that compose it can be customized in height, width and depth. A sliding door system has been chosen to express greater functionality. The accuracy of details is clearly visible on the doors, which are decorated with a bas-relief square pattern and then completely upholstered in leather. Nova walk-in closet is the perfect example of the multi-material approach: different kinds of wood, metal, leather and marble can be chosen for its realization.

Modular bookcase

NOVA.25000

Nova modular bookcase is available with modules of different widths and it is customizable in height. It can be considered as a completely "tailored made" product, which can be realized matching different kinds of marble, metal, wood and leather. Each composition is characterized by open compartments, while the functional sliding doors have been chosen as door opening system. The accuracy of the details is clearly visible on the doors, which are decorated with a bas-relief square pattern and then completely upholstered in leather.

Otto | Design Claudio Cappellini - 2019

Wall panel system

OTTO

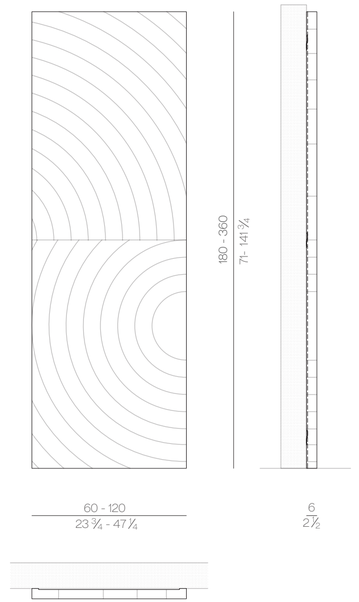

Otto wall panel system in artistic finish Moon Rock is customizable in size. For each panel the width range varies from 60cm to 120cm, while the height varies from 180cm to 360cm. Considering the artistic-handmade value of each single piece, the final result is always a unique wall. The edges of each panel, unless different requests, follow the finish of the front surface. The wall panel assembling consists of metal hanging bars, even though different hanging systems can be evaluated according to the specific needs of the customer.
